

JCP-LGS Residential Property Disclosure Reports

For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

AERIAL PHOTO COVER PAGE

This map is provided for convenience only to show the approximate location of the Property and is not based on a field survey.

NOTE TO READER: High-resolution aerial photographs are obtained through periodic surveys by low-altitude aircraft. Surveys are repeated at intervals of several years, and their coverage is limited to populated areas. On rare occasions, the air photo on this page will display a black area, or vacant land where buildings now exist. In these cases, the photo happens to be at the edge of the survey coverage area, or it shows land that has been developed since the time of the latest aerial survey. We apologize for these rare instances, which are beyond our control.

Natural Hazard Disclosure Report

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO County, CA

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

Subject Property

	Special Flood Hazard Area
	Area of Potential Flooding, Dam Failure
	Very High Fire Hazard Severity Zone
	Wildland Area, Substantial Forest Fire Risk
	Earthquake Fault Zone
	Seismic Hazard Zone, Landslide
	Seismic Hazard Zone, Liquefaction

0 0.125 0.25
miles

This map is provided for convenience only to show the approximate location of the Property and is not based on a field survey.

This INDUSTRY STANDARD REPORT contains the Natural Hazard Disclosure Report, the Tax Report and the Enviro Report.

THIS REPORT PROVIDES THE STATUTORY DISCLOSURES MANDATED BY CALIFORNIA CIVIL CODE SECTION 1103.2 AND DELIVERY OF THIS REPORT AND THE EXECUTED STATUTORY FORM IS SUFFICIENT TO MEET THE SAFE HARBOR FOR THE SELLER AND SELLER'S AGENT. THIS REPORT ALSO CONTAINS OTHER IMPORTANT DISCLOSURES AND INFORMATION. SELLER AND SELLER'S AGENT MAY HAVE ADDITIONAL RESPONSIBILITIES FOR CERTAIN DISCLOSURES WITHIN THEIR ACTUAL KNOWLEDGE.

Statutory Natural Hazard Disclosure Statement and Acknowledgment of Receipt

Address: 521 CRESCENT AVE, SAN MATEO, SAN MATEO COUNTY, CA 94402 ("Property"), **APN:** 032-021-020

The transferor and his or her agent(s) or a third-party consultant disclose the following information with the knowledge that even though this is not a warranty, prospective transferees may rely on this information in deciding whether and on what terms to purchase the Property. Transferor hereby authorizes any agent(s) representing any principal(s) in this action to provide a copy of this statement to any person or entity in connection with any actual or anticipated sale of the Property.

The following are representations made by the transferor and his or her agent(s) based on their knowledge and maps drawn by the State. This information is a disclosure and is not intended to be part of any contract between the transferee and the transferor. THIS REAL PROPERTY LIES WITHIN THE FOLLOWING HAZARDOUS AREA(S):

A SPECIAL FLOOD HAZARD AREA (Any type Zone "A" or "V") designated by the Federal Emergency Management Agency.

Yes _____ No ☒ Do not know and information not available from local jurisdiction _____

AN AREA OF POTENTIAL FLOODING shown on a dam failure inundation map pursuant to Section 8589.5 of the Government Code.

Yes _____ No ☒ Do not know and information not available from local jurisdiction _____

A VERY HIGH FIRE HAZARD SEVERITY ZONE pursuant to Section 51178 or 51179 of the Government Code. The owner of this Property is subject to the maintenance requirements of Section 51182 of the Government Code.

Yes _____ No ☒

A WILDLAND AREA THAT MAY CONTAIN SUBSTANTIAL FOREST FIRE RISK AND HAZARDS pursuant to Section 4125 of the Public Resources Code. The owner of this Property is subject to the maintenance requirements of Section 4291 of the Public Resources Code. Additionally, it is not the state's responsibility to provide fire protection services to any building or structure located within the wildlands unless the Department of Forestry and Fire Protection has entered into a cooperative agreement with a local agency for those purposes pursuant to Section 4142 of the Public Resources Code.

Yes _____ No ☒

AN EARTHQUAKE FAULT ZONE pursuant to Section 2622 of the Public Resources Code.

Yes _____ No ☒

A SEISMIC HAZARD ZONE pursuant to Section 2696 of the Public Resources Code.

Yes (Landslide Zone) _____ Yes (Liquefaction Zone) _____

No _____ Map not yet released by state ☒

THESE HAZARDS MAY LIMIT YOUR ABILITY TO DEVELOP THE REAL PROPERTY, TO OBTAIN INSURANCE, OR TO RECEIVE ASSISTANCE AFTER A DISASTER. THE MAPS ON WHICH THESE DISCLOSURES ARE BASED ESTIMATE WHERE NATURAL HAZARDS EXIST. THEY ARE NOT DEFINITIVE INDICATORS OF WHETHER OR NOT A PROPERTY WILL BE AFFECTED BY A NATURAL DISASTER. TRANSFEREE(S) AND TRANSFEROR(S) MAY WISH TO OBTAIN PROFESSIONAL ADVICE REGARDING THOSE HAZARDS AND OTHER HAZARDS THAT MAY AFFECT THE PROPERTY.

Signature of Seller _____ Date _____ Signature of Seller _____ Date _____

Signature of Agent _____ Date _____ Signature of Agent _____ Date _____

Check only one of the following:

☐ Transferor(s) and their agent(s) represent that the information herein is true and correct to the best of their knowledge as of the date signed by the transferor(s) and agent(s).

☒ Transferor(s) and their agent(s) acknowledge that they have exercised good faith in the selection of a third-party report provider as required in Civil Code Section 1103.7, and that the representations made in this Natural Hazard Disclosure Statement are based upon information provided by the independent third-party disclosure provider as a substituted disclosure pursuant to Civil Code Section 1103.4. Neither transferor(s) nor their agent(s) (1) has independently verified the information contained in this statement and Report or (2) is personally aware of any errors or inaccuracies in the information contained on the statement. This statement was prepared by the provider below:

Third-Party Disclosure Provider(s)

Greg Rufe, Chief Operating Officer
JCP-LGS Disclosure Reports

Date 05/23/2013 Rept. No. 1336416

Transferee represents that he or she has read and understands this document. I (We) also have read and understand the additional disclosures and notices herein:

- A. Additional State-required Disclosures – Refer to Report: (1) COMMERCIAL/INDUSTRIAL USE ZONE, (2) FORMER MILITARY ORDNANCE SITE, (3) AIRPORT INFLUENCE AREA, (4) RIGHT TO FARM NOTICE, (5) NOTICE OF MINING OPERATIONS, (6) SEX OFFENDER DATABASE (Megan's Law), (7) GAS AND HAZARDOUS LIQUID TRANSMISSION PIPELINE DATABASE, (8) SAN FRANCISCO BAY CONSERVATION AND DEVELOPMENT DISTRICT JURISDICTION, (9) CALIFORNIA ENERGY COMMISSION ZONE REQUIREMENTS.
- B. Additional City and County General Plan Hazard Disclosures as applicable – Refer to Report: Airports, Avalanche, Blow Sand, Coastal Zone, Dam/Levee Failure Inundation, Debris Flow, Erosion, Flood, Fault Zone, Fire, Groundwater, Landslide, Liquefaction, Methane Gas, Mines, Naturally Occurring Asbestos, Redevelopment Area, Right to Farm, Runoff Area, Sea Level, Seiche, Seismic Shaking, Seismic Ground Failure, Slope Stability, Soil Stability, Subsidence, TRPA, Tsunami.
- C. General Advisories – Refer to Report: Methamphetamine Contamination, Mold, Radon, Endangered Species, Abandoned Mines, Oil & Gas Wells, Tsunami Maps.
- D. Additional Reports – Enclosed if ordered. Refer to Report: (1) PROPERTY TAX REPORT (includes State-required NOTICES OF MELLO-ROOS & 1915 BOND ACT ASSESSMENTS and NOTICE OF SUPPLEMENTAL PROPERTY TAX BILL), (2) ENVIRONMENTAL HAZARD REPORT, (3) INSURANCE CLAIMS HISTORY REPORT (C.L.U.E. © Home Sellers Disclosure Report).
- E. Government Guides in Combined Booklet with report. Refer to Booklet: (1) ENVIRONMENTAL HAZARDS: "A Guide for Homeowners, Buyers, Landlords and Tenants"; (2) EARTHQUAKE SAFETY: "The Homeowner's Guide To Earthquake Safety" and included "RESIDENTIAL EARTHQUAKE HAZARDS REPORT FORM"; (3) LEAD-BASED PAINT: "Protect Your Family From Lead In Your Home"; (4) BRIEF GUIDE TO MOLD, MOISTURE AND YOUR HOME; (5) "WHAT IS YOUR HOME ENERGY RATING?" Government Guides are also available on the Company's "Electronic Bookshelf" at <http://www.disclosures.com/>.

NOTES: (1) This product includes the Natural Hazard Disclosure Report. Additional reports are included only if ordered. (2) Any Addenda are local disclosures and advisories (where applicable) which JCP-LGS provides as an accommodation at the request of the local real estate board and SIGNATURES MAY BE REQUIRED. (3) The representations in this Natural Hazard Disclosure Statement do not constitute all of the transferor's or agent's disclosure obligations in this transaction.

ITEMIZED REPORT CONTENTS

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

This product includes the following Disclosures and Advisories:

Natural Hazard Report Disclosures and Advisories

(Signature Required on the Statutory Form – See preceding page)

- | | |
|---|---|
| ✓ State Level Natural Hazard Disclosures (Statutory Form) | ✓ Statewide Right to Farm Disclosure |
| ✓ Local City and County Level Natural Hazard Disclosures (where applicable) | ✓ Notice of Mining Operations |
| ✓ Commercial/Industrial Disclosure | ✓ Methamphetamine Contaminated Property Disclosure Advisory |
| ✓ Former Military Ordnance Site Disclosure | ✓ Mold Advisory |
| ✓ Airport Influence Area / Airport Noise Disclosure | ✓ Radon Advisory |
| ✓ Sex Offender Database Disclosure (Megan's Law) | ✓ Endangered Species Act Advisory |
| ✓ Transmission Pipeline Database Disclosure | ✓ Abandoned Mines Advisory |
| ✓ San Francisco Bay Conservation and Development Commission Disclosure (where applicable) | ✓ Oil & Gas Well Advisory |
| ✓ California Energy Efficiency Disclosure | ✓ Tsunami Map Advisory |

California Property Tax Report Disclosures and Advisories

- ✓ Notice of Special Tax and Assessment (Mello-Roos and 1915 Bond Act)
- ✓ Notice of Supplemental Property Tax Bill
- ✓ Private Transfer Fee Disclosure Advisory
- ✓ SRA Fire Prevention Fee Disclosure

Environmental Report Disclosures and Advisories

- ✓ Notification of known contaminated sites in proximity to the property
- ✓ Oil and Gas Wells Disclosure
- ✓ Gas Transmission and Hazardous Liquid Pipeline Disclosure

The Natural Hazard Disclosure Report

For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

SUMMARY OF NATURAL HAZARD DISCLOSURES

*Map N/A: Map not available, and/or not officially adopted by the jurisdiction, and/or not of sufficient scale from which to make parcel specific determinations.

STATE LEVEL DETERMINATIONS

IN	NOT IN	MAP N/A*	Hazards	The Property is:	Refer to page:
	✓		Flood	NOT IN a Special Flood Hazard Area. The Property is IN a FEMA-designated Flood Zone X.	8
	✓		Dam	NOT IN an area of potential dam inundation.	8
	✓		Very High Fire Hazard Severity	NOT IN a very high fire hazard severity zone.	9
	✓		Wildland Fire Area	NOT IN a state responsibility area.	9
	✓		Fault	NOT IN an earthquake fault zone designated pursuant to the Alquist-Priolo Act.	10
		✓	Landslide	Map Not Available	10
		✓	Liquefaction	Map Not Available	10

COUNTY LEVEL DETERMINATIONS

IN	NOT IN	MAP N/A*	Hazards	The Property is:	Refer to page:
	✓		Fault	NOT IN a mapped active or potentially active fault zone or within one-eighth of one mile of an inactive fault trace	12
	✓		Landslide	NOT IN a landslide-prone area that includes defined, probable, suspected, or conjectured landslides nor within one-quarter of one-mile of a small landslide	12
	✓		Liquefaction	NOT IN a mapped area of identified liquefaction potential	12
	✓		Tsunami	NOT IN a mapped area of potential inundation from tsunami or seiche	12
	✓		Coastal Bluff	NOT IN a mapped coastal bluff area subject to retreat, slides, rock falls, and extensive erosion from ground water surface runoff and wave action	12
	✓		Dam Inundation	NOT IN a mapped area of potential inundation from dam failure	12

JCP-LGS Residential Property Disclosure Reports

The Natural Hazard Disclosure Report

For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

CITY LEVEL DETERMINATIONS

IN	NOT IN	MAP N/A*	Hazards	The Property is:	Refer to page:
	✓		Fault	NOT WITHIN a 660 feet of a mapped Fault.	14
	✓		Landslide	NOT WITHIN one-quarter of one mile of one or more mapped Landslide Deposit.	14
	✓		Liquefaction	NOT IN a mapped area of High or Moderate Liquefaction Potential.	14
✓			Slope	IN a mapped area of Moderate Slope Failure Potential.	14
	✓		Flood	NOT IN a mapped area of potential inundation due to 100-Year Peak Storm Water.	14
✓			Ground Shaking	IN a mapped area of Moderate Shaking Amplification during Earthquakes.	14
	✓		Levee Inundation	NOT IN a mapped area of Potential Inundation due to Bayfront Levee Failure.	14

SUMMARY OF ADVISORIES AND ADDENDA

ADVISORIES

ADVISORY	ADVISORY NOTATION	Refer to page:
Registered Sex Offender Data Base (Megan Law)	Provides an advisory required pursuant to Section 290.46 of the Penal Code. Information about specified registered sex offenders is made available to the public. Please refer to State required notification on page referenced herein.	24
Gas and Hazardous Liquid Transmission Pipeline Database Notice	Provides a notice required pursuant to Section 2079.10.5(a) of the Civil Code. Information about transmission pipeline location maps is made available to the public.	25
Methamphetamine Contamination	Provides an advisory that a disclosure may be required pursuant to the "Methamphetamine Contaminated Property Cleanup Act of 2005".	26
Mold	Provides an advisory that all prospective purchasers of residential and commercial property should thoroughly inspect the subject property for mold and sources for additional information on the origins of and the damage caused by mold.	26
Radon	Provides an advisory on the risk associated with Radon gas concentrations.	27
Endangered Species	Provides an advisory on resources to educate the public on locales of endangered or threatened species.	28
Abandoned Mines	Provides an advisory on resources to educate the public on the hazards posed by, and some of the general locales of, abandoned mines.	29
Oil and Gas Wells	Provides an advisory on the potential existence of oil and gas wells and sources for additional general and/or specific information.	29
Tsunami Map Advisory	Provides an advisory about maximum tsunami inundation maps issued for jurisdictional emergency planning.	30

ADDENDA*

ADDENDUM	ADDENDUM NOTATION	Refer to page:
Real Estate Transfer Disclosure Statement	Provides a statutory Local Option form for Airport Noise disclosure complete with noise maps for affected jurisdictions. BUYER/SELLER/AGENT SIGNATURES REQUIRED.	34

* Addenda are local disclosures and advisories (where applicable) that The Company provides as an accommodation at the request of the local real estate board. **SIGNATURES MAY BE REQUIRED.**

JCP-LGS Residential Property Disclosure Reports

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

STATUTORY NATURAL HAZARD DISCLOSURE EXPLANATIONS

The statutory Natural Hazard Disclosure Statement on page one of this report does not provide for informing purchasers if the property is only partially within any of the delineated zones or provide additional flood zone information which could be very important to the disclosure process. The following summary is meant to give buyers the additional information they may need to help them in the decision making process and to place the information in perspective.

SPECIAL FLOOD HAZARD AREA

DISCUSSION: Property in a Special Flood Hazard Area (any type of Zone "A" or "V" as designated by the Federal Emergency Management Agency ("FEMA")) is subject to flooding in a "100-year rainstorm." Federally connected lenders are required to have homeowners maintain flood insurance in these zones. A 100-year flood occurs on average once every 100 years, but may not occur in 1,000 years or may occur in successive years. According to FEMA, a home located within a SFHA has a 26% chance of suffering flood damage during the term of a 30-year mortgage. Other types of flooding, such as dam failure, are not considered in developing these zones. In some cases, the insurance requirement may be waived or modified by obtaining a Letter of Map Revision ("LOMR") or Letter of Map Amendment ("LOMA") from the FEMA. This might be possible where flooding is shallow and fill was placed on the site, appropriate flood control measures were taken, or only the lot and no part of the structure is in the zone. Contact FEMA directly for more information. Flood insurance for properties in Zones B, C, D, X, X500, and X500_Levee is available but is not required.

Zones A, AO, AE, AH, AR, A1-A30: Area of "100-year" flooding - a 1% or greater chance of annual flooding.

Zones V, V1-V30: Area of "100-year" flooding in coastal (shore front) areas subject to wave action.

Zone B: Area of moderate flood risk. These are areas between the "100" and "500" year flood-risk levels.

Zones C, D: NOT IN an area of "100-year" flooding. Area of minimal (Zone C) or undetermined (Zone D) flood hazard.

Zones X: An area of minimal flood risk. These are areas outside the "500" year flood-risk level.

Zone X500: An area of moderate flood risk. These are areas between the "100" and "500" year flood-risk levels.

Zone X500_LEVEE: An area of moderate flood risk that is protected from "100-year flood" by levee and that is subject to revision to high risk (Zone A) if levee is decertified by FEMA.

Zone N: Area Not Included, no flood zone designation has been assigned or not participating in the National Flood Insurance Program.

Note: If the Property is subject to a Letter of Map Amendment ("LOMA") or a Letter of Map Revision ("LOMR") issued by FEMA, a copy of the LOMA or LOMR must be attached to the Natural Hazard Disclosure Statement ("NHDS") or appropriate disclosure statement. The Company is not always able to determine if the Property is subject to a LOMA or a LOMR. Even if such information is available to the Company, the Company is unable to attach a copy of the LOMA or LOMR to the NHDS. If Seller is aware that the Property is subject to a LOMR or a LOMA, the Seller shall attach a copy to the NHDS and notify the Company.

For more information about flood zones, visit:

http://www.floodsmart.gov/floodsmart/pages/flooding_flood_risks/defining_flood_risks.jsp

PUBLIC RECORD: Official Flood Insurance Rate Maps ("FIRM") compiled and issued by the Federal Emergency Management Agency ("FEMA") pursuant to 42 United States Code §4001, et seq.

AREA OF POTENTIAL FLOODING (DAM FAILURE)

DISCUSSION: Local governmental agencies, utilities, and owners of certain dams are required to prepare and submit inundation maps for review and approval by the California Office of Emergency Services ("OES"). A property within an Area of Potential Flooding Caused by Dam Failure is subject to potential flooding in the event of a sudden and total dam failure with a full reservoir. Such a failure could result in property damage and/or personal injury. However, dams rarely fail instantaneously and reservoirs are not always filled to capacity. Please note that not all dams (such as federally controlled dams) located within the state have been included within these dam inundation zones. Also these maps do not identify areas of potential flooding resulting from storms or other causes.

PUBLIC RECORD: Official dam inundation maps or digital data thereof made publicly available by the State of California Office of Emergency Services ("OES") pursuant to California Government Code §8589.5.

JCP-LGS Residential Property Disclosure Reports

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

VERY HIGH FIRE HAZARD SEVERITY ZONE (VHFHSZ)

DISCUSSION: VHFHSZs can be defined by the California Department of Forestry and Fire Protection ("Calfire") as well as by local fire authorities within "Local Responsibility Areas" where fire suppression is the responsibility of a local fire department. Properties located within VHFHS Zones may have a higher risk for fire damage and, therefore, may be subject to (i) additional construction requirements such as a "Class A" roof for new construction or replacement of existing roofs; and (ii) additional maintenance responsibilities such as adequate vegetation clearance near the structure, spark screens on chimneys and stovepipes, leaf removal from roofs, and other basic fire-safety practices. Contact the local fire department for a complete list of requirements and exceptions.

PUBLIC RECORD: Maps issued by Calfire pursuant to California Public Resources Code § 51178 recommending VHFHSZs to be adopted by the local jurisdiction within its Local Responsibility Area, or VHFHSZs adopted by the local jurisdiction within the statutory 120-day period defined in California Public Resources Code § 51179.

WILDLAND FIRE AREA (STATE RESPONSIBILITY AREA)

DISCUSSION: The State Board of Forestry classifies all lands within the State of California based on various factors such as ground cover, beneficial use of water from watersheds, probable damage from erosion, and fire risks. Fire prevention and suppression in all areas which are not within a Wildland - State Responsibility Area ("WSRA") is primarily the responsibility of the local or federal agencies, as applicable.

For property located within a WSRA, please note that (1) there may be substantial forest fire risks and hazards; (2) except for property located within a county which has assumed responsibility for prevention and suppression of all fires, it is NOT the state's responsibility to provide fire protection services to any building or structure located within a WSRA unless the Department has entered into a cooperative agreement with a local agency; and (3) the property owner may be subject to (i) additional construction requirements such as a "Class A" roof for new construction or replacement of existing roofs; and (ii) additional maintenance responsibilities such as adequate vegetation clearance near the structure, spark screens on chimneys and stovepipes, leaf removal from roofs, and other basic fire-safety practices.

The existence of local agreements for fire service is not available in the Public Record and, therefore, is not included in this disclosure. For very isolated properties with no local fire services or only seasonal fire services there may be significant fire risk. If the Property is located within a WSRA, please contact the local fire department for more detailed information.

PUBLIC RECORD: Official maps issued by the California Department of Forestry and Fire Protection ("Calfire") pursuant to California Public Resources Code § 4125.

SRA Fire Prevention Benefit Fee Advisory

On January 23, 2012, the State Board of Forestry and Fire Protection ("Board") adopted an emergency regulation that implements a Fire Prevention Benefit Fee ("Benefit Fee") imposed annually on property owners in wildland areas where the state has responsibility for providing fire protection. According to the adopted regulation, the Benefit Fee is one hundred-fifty dollars (\$150.00) per habitable structure in the State Responsibility Area ("SRA"), including single-family homes, multi-dwelling structures, mobile and manufactured homes, and condominiums. The Board regulation is pursuant to Chapter 1.5 (commencing with Section 4210) to Part 2 of Division 4 of the Public Resources Code (also known as Assembly Bill X1 29). The regulation allows a fee reduction of thirty-five dollars (\$35.00) per habitable structure located in the SRA and within the boundaries of a local agency that provides fire protection services. For more information, please refer to "Part 6. State Responsibility Area Fire Prevention Fee" in the JCP-LGS Property Tax Report.

JCP-LGS Residential Property Disclosure Reports

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

EARTHQUAKE FAULT ZONE

DISCUSSION: Earthquake Fault Zones are delineated and adopted by California as part of the Alquist-Priolo Earthquake Fault Zone Act of 1972. Property in an Earthquake Fault Zone ("EF Zone") does not necessarily have a fault trace existing on the site. EF Zones are areas or bands delineated on both sides of known active earthquake faults. EF Zones vary in width but average one-quarter (1/4) mile in width with the "typical" zone boundaries set back approximately 660 feet on either side of the fault trace. The potential for "fault rupture" damage (ground cracking along the fault trace) is relatively high only if a structure is located directly on a fault trace. If a structure is not on a fault trace, shaking will be the primary effect of an earthquake. During a major earthquake, shaking will be strong in the vicinity of the fault and may be strong at some distance from the fault depending on soil and bedrock conditions. It is generally accepted that properly constructed wood-frame houses are resistant to shaking damage.

PUBLIC RECORD: Official earthquake fault zone or special study zone maps approved by the State Geologist and issued by the California Department of Conservation, California Geological Survey pursuant to California Public Resources Code §2622.

SEISMIC HAZARD MAPPING ACT ZONE

DISCUSSION: Official Seismic Hazard Zone ("SH Zone") maps delineate Areas of Potential Liquefaction and Areas of Earthquake-Induced Landsliding. A property that lies partially or entirely within a designated SH Zone may be subject to requirements for site-specific geologic studies and mitigation before any new or additional construction may take place.

Earthquake-Induced Landslide Hazard Zones are areas where the potential for earthquake-induced landslides is relatively high. Areas most susceptible to these landslides are steep slopes in poorly cemented or highly fractured rocks, areas underlain by loose, weak soils, and areas on or adjacent to existing landslide deposits. The CGS cautions these maps do not capture *all* potential earthquake-induced landslide hazards and that earthquake-induced ground failures are not addressed by these maps. Furthermore, no effort has been made to map potential run-out areas of triggered landslides. It is possible that such run-out areas may extend beyond the zone boundaries. An earthquake capable of causing liquefaction or triggering a landslide may not uniformly affect all areas within a SH Zone.

Liquefaction Hazard Zones are areas where there is a potential for, or an historic occurrence of liquefaction. Liquefaction is a soil phenomenon that can occur when loose, water saturated granular sediment within 40 feet of the ground surface, are shaken in a significant earthquake. The soil temporarily becomes liquid-like and structures may settle unevenly. The Public Record is intended to identify areas with a relatively high potential for liquefaction but not to predict the amount or direction of liquefaction-related ground displacement, nor the amount of damage caused by liquefaction. The many factors that control ground failure resulting from liquefaction must be evaluated on a site specific basis.

PUBLIC RECORD: Official seismic hazard maps or digital data thereof approved by the State Geologist and issued by the California Department of Conservation, California Geological Survey pursuant to California Public Resources Code §2696.

STATUTORY NATURAL HAZARD DISCLOSURE REPORTING STANDARD: "IN" shall be reported if any portion of the Property is located within any of the above zones as delineated in the Public Record. "NOT IN" shall be reported if no portion of the Property is located within any of the above zones as delineated in the Public Record.

"Map Not Available" shall be reported in areas not yet evaluated by the governing agency according to the Public Record. Please note that "Map Not Available" will be applicable to most portions of the state. Official Seismic Hazard Zone ("SH Zone") maps delineate Areas of Potential Liquefaction and Areas of Earthquake-Induced Landsliding.

JCP-LGS Residential Property Disclosure Reports

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

LOCAL COUNTY-LEVEL AND CITY-LEVEL NATURAL HAZARD DISCLOSURE EXPLANATIONS

PUBLIC RECORDS AND LOCAL REPORTING STANDARDS

HAZARD MAPS IN THE LOCAL GENERAL PLAN: In addition to those federal and state maps associated with disclosures specified under California Civil Code Section 1103, counties and cities have additional maps which depict various geologic and seismic hazards that local agencies consider when approving land use and development permit applications. These may include maps contained in the Safety Element and/or Seismic Safety Element of a General Plan that has been officially adopted by a city or county.

Unless otherwise specified, only those officially adopted Safety Element or Seismic Safety Element maps (or digital data thereof) which are publicly available, are of a scale, resolution, and quality that readily enable parcel-specific hazard determinations, and are consistent in character with those statutory federal or state disclosures will be considered for eligible for use as the basis for county- or city-level disclosures set forth in this Report. Please also note:

- If an officially adopted Safety Element or Seismic Safety Element map relies on data which is redundant of that used for state-level disclosures, this Report will indicate so and advise Report recipients to refer to the state-level hazard discussion section for more information.
- If an officially adopted Safety Element or Seismic Safety Element cites underlying maps created by another agency, those maps may be regarded as incorporated by reference and may be used as the basis for parcel-specific determinations if those maps meet the criteria set forth in this section.
- Because county- and city-level maps are developed independently and do not necessarily define or delineate a given hazard the same way, the boundaries for the "same" hazard may be different.

If one or more maps contained in the Safety Element and/or Seismic Safety Element of an officially adopted General Plan are used as the basis for local disclosure, those maps will appear under the "Public Record(s) Searched" for that county or city.

REPORTING STANDARDS

A good faith effort has been made to disclose all hazard features on pertinent Safety Element and Seismic Safety Element maps with well-defined boundaries; however, those hazards with boundaries that are not delineated will be deemed not suitable for parcel-specific hazard determinations. Some map features, such as lines drawn to represent the location of a fault trace, may be buffered to create a zone to facilitate disclosure. Those map features which can not be readily distinguished from those representing hazards may be included to prevent an omission of a hazard feature. If the width of a hazard zone boundary is in question, "IN" will be reported if that boundary impacts any portion of a property. Further explanations concerning specific map features peculiar to a given county or city will appear under the "Reporting Standards" for that jurisdiction.

PUBLIC RECORDS VS. ON-SITE EVALUATIONS

Mapped hazard zones represent evaluations of generalized hazard information. Any specific site within a mapped zone could be at less or more relative risk than is indicated by the zone designation. A site-specific evaluation conducted by a geotechnical consultant or other qualified professional may provide more detailed and definitive information about the Property and any conditions which may or do affect it.

PROPERTY USE AND PERMITTING

No maps beyond those identified as "Public Record(s)" have been consulted for the purpose of these local disclosures. These disclosures are intended solely to make Report recipient(s) aware of the presence of mapped hazards. For this reason – and because local authorities may use on these or additional maps or data differently to determine property-specific land use and permitting approvals - Report recipients are advised to contact the appropriate local agency, usually Community Development, Planning, and/or Building, prior to the transaction to ascertain if these or any other conditions or related regulations may impact the Property use or improvement.

JCP-LGS Residential Property Disclosure Reports

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

SAN MATEO COUNTY GEOLOGIC ZONES DISCUSSION

PUBLIC RECORD(S) SEARCHED: The following Public Records, incorporated into the Seismic Safety Element of the General Plan as adopted by the County Board of Supervisors in 1978 and updated in 1986, are utilized for those county-level disclosures below: "Geotechnical Hazard Synthesis Map," a map series created by the San Mateo County Planning Department and Leighton & Associates.

FAULT

This Report will indicate if any portion of the Property is within any of the following mapped faults:

- **Active faults (Alquist-Priolo Earthquake Fault Zone)** are faults that have shown evidence of displacement during the most recent epoch of geologic time, the Holocene epoch, generally considered to have begun about 11,000 years ago.
- **Potentially active faults** are faults which displace geologic formations of Pleistocene age but show no evidence of movement in the Holocene period. Pleistocene time is the period between about two million years ago and 11,000 years ago.
- **Inactive faults** are faults which show no evidence of movement during the past two million years and show no potential for movement in the future. Inactive faults are not considered to be a high hazard, but building set-backs may be required by the county prior to construction near them

Reporting Standards: If any portion of the Property is within an Active Fault or Potentially Active Fault Zone, or within one-eighth of one mile (660 feet) of an Inactive Fault as delineated in the Public Record, "WITHIN" shall be reported.

LANDSLIDE

Landslide-prone areas are divided into several categories. The following are considered to be the most hazardous: definite landslide, active landslides, landslides mapped in the field, and probable landslide deposits.

Reporting Standards: If any portion of the Property is within a Definite Landslide, Active Landslide, Landslide Mapped in the Field, or Probable Landslide as delineated in the Public Record, or is within one-quarter of one mile (1,320 feet) of a "small landslide of 50-500 ft. mapped in the field" (identified by stars of uniform size), "IN" shall be reported. Small landslides mapped by photointerpretation and suspected or conjectured landslides are not reported as the manner in which they are represented does not readily lend itself to parcel-specific determinations.

COASTAL CLIFF OR BLUFF STABILITY

Coastal Cliff or Bluff Stability areas are divided into three categories: areas of low stability, areas of moderate stability and areas of high stability. An area designated as low stability is considered a high geologic hazard, since the historic rate of cliff retreat is generally greater than one foot per year. Areas of moderate and high stability have historic rates of cliff retreat of less than one foot per year.

Reporting Standards: If any portion of the Property is within a Coastal Cliff or Bluff Stability Area as delineated in the Public Record, "IN" shall be reported.

LIQUEFACTION POTENTIAL

Liquefaction: Liquefaction is a transformation of a granular material from a solid into a liquefied state due to increase pore-water pressure resulting from seismic shaking. Liquefaction potential at a given site depends on the extent, distribution, density, grain size, and degree of saturation of the sand or silty sand strata. Geometry of subsurface units and proximity to a sloping surface can also impact surface damage potential. Areas of Variable, Moderate, and Generally Low liquefaction potential in unconsolidated material are mapped.

Bay Mud Areas: These areas include tidal marshlands and mud flats, sometimes overlain by artificial fill. Bay mud areas are primarily deposits of unconsolidated clay, silt, and sands. Earthquake-shaking intensity may range from very strong to violent in this zone. The most probable type of failure associated with liquefaction in bay mud deposits is lateral spreading (horizontal surface failure). Bay muds are mapped as Areas of Variable Liquefaction.

Reporting Standards: If any portion of the Property is within an Area of Variable Liquefaction Potential (including Bay Mud Areas), Moderate Liquefaction Potential, or Generally Low Liquefaction Potential as delineated in the Public Record, "IN" shall be reported.

JCP-LGS Residential Property Disclosure Reports

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

TSUNAMI AND SEICHE

Tsunamis or Seiche Zones are generally coastal areas and reservoir or lake front properties. During earthquakes, tsunamis ("tidal waves") and seiches (large waves created in reservoirs or lakes by earthquake shaking) sometimes occur and can cause considerable damage to ocean, lake or reservoir front properties.

Reporting Standards: If any portion of the Property is within a Tsunami & Seiche area as delineated in the Public Record, "IN" shall be reported.

DAM INUNDATION

Inundation from Dam Failure areas may be subject to flooding in the event of dam failure. There are approximately 20 dams of significant size in the county, the two largest of which are Lower Crystal Springs Dam and San Andreas Dam.

Reporting Standards: If any portion of the Property is within an Inundation from Dam Failure area as delineated in the Public Record, "IN" shall be reported.

Report Date: 05/23/2013
Report Number: 1336416

CITY OF SAN MATEO GEOLOGIC DISCUSSION

PUBLIC RECORD(S) SEARCHED: The following Public Record(s), referenced in the Safety Element of the City of San Mateo City General Plan as officially adopted in 2010, is/are used for the City-level disclosure(s) below: "Figure S-1: Shaking Amplification During Earthquakes"; "Figure S-2: Slope Stability & Liquefaction During Earthquakes"; "Figure S-3: Potential Flood Hazards: Storm Water Runoff"; "Figure S-4: Potential Flood Hazards: Dam and Levee Failure"; and "Appendix H: Potential Geologic and Seismic Hazards".

FAULT

The San Andreas Fault lies approximately two miles west of the San Mateo City boundary and the Hayward Fault lies approximately 14 miles to the East. Despite their close proximity, there is no evidence of significant ground rupturing in the City during the last one million years. There are no known active faults in San Mateo, and inactive faults which are present are older features which do not exhibit indications of recent motion. There is no reason to expect a recurrence of movement along these other fault traces.

Reporting Standards: California's Alquist-Priolo Fault Zone Act (1972) established a standard for the width of a regulatory fault zone -- one-eighth of one mile on both sides of an active fault trace. For city-level reporting purposes, "WITHIN" shall be reported if any portion of the Property is within one-eighth of one mile (660 feet) of a "Fault" as delineated within the City Limits in the Public Record that is not bounded by a regulatory fault zone. "NOT WITHIN" shall be reported if no portion of the Property is situated within one-eighth of one mile of a "Fault" delineated in the Public Record.

LIQUEFACTION

Liquefaction is a form of ground failure which occurs as a result of an earthquake when grains of soil become saturated. The soils become unstable and may behave as a liquid, causing sudden ground failure. Liquefaction can be particularly destructive to building foundations. Two common engineering practices to minimize these effects are to support buildings on piles driven through filled soils to bedrock or on "floating" foundations designed to shift with the altered soils. In San Mateo, the risk of liquefaction is highest on former baylands which were filled, which extends as far west as El Camino Real. Areas of particular concern in the former baylands include former sand beds or tidal channels. Site-specific geotechnical and engineering studies subject to review and approval by the City Engineer and Building Official are required for development proposed on sites as having moderate or high potential for ground failure.

Reporting Standards: "IN" shall be reported as will the more severe "Liquefaction Potential" rating ("High" or "Moderate") affecting any portion of the Property within the City Limits as delineated in the Public Record. "NOT IN" shall be reported if no portion of the Property is within an area of Liquefaction Potential as delineated in the Public Record.

LANDSLIDE

Landslides can cause extensive damage to buildings, roadways or other property located on or below the landslide. Numerous landslides have been mapped within the City. Movement on landslides can result from periods of heavy rainfall, large earthquakes, or improper grading or drainage practices. Landsliding can also result where excavations (cut slopes) are made into hillsides. Erosion control measures are required for all development sites having landslide deposits.

Reporting Standards: "WITHIN" shall be reported if any portion of the Property is situated within 0.25 miles of one or more "Landslide Deposit" within the City Limits as delineated in the Public Record. (NOTE: The 0.25 mile proximity determination is applied because the Public Record depicts each Landslide Deposit as a uniform map symbol which does not indicate the dimensions, location, or potential movement direction of the landslide mass.) "NOT WITHIN" shall be reported if no portion of the Property is situated within 0.25 miles of a "Landslide Deposit" within the City Limits as delineated in the Public Record.

SLOPE STABILITY

Sudden slope failure is usually associated with heavy rainfall or a major earthquake. In the Bay Area, landslides most commonly occur on slopes greater than 15%. Grading activities which increase slope or alter drainage patterns often contribute to landslides. San Mateo's western hills are generally stable. Past known slope failures, which number over 50, have primarily occurred in the Laurelwood, Highlands and Country Club Heights areas. Although past landslides have caused property damage, no loss of life or dwellings has occurred. Site-specific geotechnical and engineering studies subject to review and approval by the City Engineer and Building Official are required for development proposed on sites as having moderate or high potential for ground failure.

Reporting Standards: "IN" shall be reported as will the more severe "Slope Failure Potential" rating ("High" or "Moderate") affecting any portion of the Property within the City Limits as delineated in the Public Record. "NOT IN" shall be reported if no portion of the Property is within an area of Slope Failure Potential as delineated in the Public Record.

GROUND SHAKING

JCP-LGS Residential Property Disclosure Reports

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

Past earthquakes have shown that often the underlying soil conditions pose a greater hazard to structures than the proximity to a fault. Ground shaking from an earthquake is amplified and lasts longer in unconsolidated or water saturated, soils such as bay mud, than in harder bedrock. Ground shaking can cause structural failure of buildings in moderate to severe earthquakes, particularly older structures built prior to the establishment of seismic safety standards in 1933. Masonry buildings are particularly vulnerable to the lateral motion of earthquakes unless properly reinforced. Concrete tilt-up buildings constructed prior to 1973 may also be vulnerable to structural damage due to ground shaking. Most steel and wood frame buildings, due to their lighter materials and seismic stability, have an excellent performance record. Beyond structural failure, building features including exterior parapets, ornamentation and large windows may be hazardous in the event of an earthquake. Other potentially dangerous effects of ground shaking may include separation of buildings from their foundations, falling furniture and suspended ceilings, and collapsed chimneys.

Reporting Standards: "IN" shall be reported as will the more/most severe Shaking Amplification during Earthquakes ("Extremely High", "Very High", "High", "Moderately High", "Moderate", "Moderately Low", "Low", or "Very Low") as delineated in the Public Record affecting any portion of the Property within the City Limits.

FLOODING (STORMWATER DRAINAGE)

Storm water drains through San Mateo to the Bay via three distinct drainage basins -- the San Mateo Creek complex, North San Mateo complex, and the Marina Lagoon Complex, each composed of numerous stream channels, culverts, and storm drainage piping systems. The San Mateo Creek watershed located within City limits is fully urbanized and little additional runoff is anticipated from new development. The majorities of the remaining watersheds are conservation lands meant to protect the water quality of Crystal Springs Reservoirs and will remain undeveloped. The North San Mateo watershed complex is almost entirely urbanized with the exception of Sugarloaf Mountain, and little increase in runoff due to future development is anticipated. Control of erosion and impervious surfaces on Sugarloaf is important to reduce runoff into Laurel Creek. In the past, flooding has occurred at several locations within the Marina Lagoon drainage complex due to inadequate channel and storage capacities or blockages during storms. In the 1970's, Laurel Creek Dam was overtopped, flooding a substantial portion of the San Mateo Village neighborhood. In the 1980's, East Laurel Creek Dam was overtopped, damaging homes immediately downstream. San Mateo Village was also flooded in 1955, 1966 and 1982. Marina Lagoon was created from Seal Slough for flood control in the 1950's and deepened in 1965. Although heavy storm runoff never overtopped the Marina Lagoon levees, the water elevation rose to dangerous heights in 1974 and 1982. In 1984 the pump capacity at the Lagoon's entry into the Bay was increased to a maximum discharge capacity of 750,000 cubic feet per second, adequate to contain the 100-year storm and flooding in the Marina Lagoon drainage area.

Reporting Standards: "IN" shall be reported if any portion of the Property is within an "Inundation Area Due to 100-Year Peak Storm Water" within the City Limits as delineated in the Public Record. "NOT IN" shall be reported if no portion of the Property is within an "Inundation Area Due to 100-Year Peak Storm Water" as delineated in the Public Record.

LEVEE FAILURE

The City of San Mateo's levees are structurally stable, with the exception of approximately 1,000 feet of levee adjacent to the City of Foster City which are to be reconstructed in the near future (as of the date the General Plan was adopted). The probability of their failure is very low. However, failure could result from a major earthquake or severe storm conditions. Should a failure occur at high tide, property could be inundated up to an elevation of 4.7 feet (San Mateo datum/7.06 ft. NGVD), or a maximum water depth of about six feet in the lowest areas of the Shoreview neighborhood.

Reporting Standards: "IN" shall be reported if any portion of the Property within the City Limits is within the "Boundary of Potential Inundation Due to Bayfront Levee Failure" as delineated in the Public Record. "NOT IN" shall be reported if no portion of the Property within the City Limits is within the "Boundary of Potential Inundation Due to Bayfront Levee Failure" as delineated in the Public Record.

OTHER HAZARDS

Six dams affect the City of San Mateo: Crystal Springs, San Andreas, Laurel Creek and East Laurel Creek (2), and Tobin Creek in Hillsborough. The areas of "Potential Inundation due to Laurel Creek Dam Failure" and "Potential Inundation due to Crystal Springs Dam Failure", as depicted in the Public Record, along with the potential inundation areas in the event of a failure of those other dams, are disclosed in the state-level discussion and disclosure of Area of Potential Flooding (Dam Inundation) in the preceding section of this Report.

The following natural hazards are discussed at length but not mapped in the City General Plan:

GROUND SETTLEMENT

Other geologic processes occur in San Mateo which may not be life-threatening, but nonetheless cause damage to property and the environment. Ground settlement results from the compaction of unconsolidated soils, causing buildings and foundations to crack, and utility lines to separate. In San Mateo, ground settlement typically occurs on filled baylands in the

JCP-LGS Residential Property Disclosure Reports

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

eastern portion of the City. Mitigating measures include proper soil compaction, construction methods such as pile driving or floating foundations, and allowance of settlement in the design of utilities.

Reporting Standards: No determination is reported because the Public Record does not include a map which delineates the boundaries for this hazard within the City Limits.

SOIL EROSION

Soil erosion and the resulting sedimentation of creeks and storm drains are natural processes which can be greatly accelerated by human activities such as grading, vegetation clearing and poorly engineered drainage systems. This problem is most critical in the western hills, and can be controlled through development restrictions and engineering techniques. Erosion control measures are required for all development sites where grading activities are occurring, including those having landslide deposits, past erosion problems, the potential for storm water quality impacts, or slopes of 15% or greater which are to be altered. Control measures shall retain natural topographic and physical features of the site if feasible.

Reporting Standards: No determination is reported because the Public Record does not include a map which delineates the boundaries for this hazard within the City Limits.

TSUNAMI & SEICHE

Tsunamis, or seismically generated sea waves, are rare in California due to the lack of submarine earthquake faults. An Alaskan generated tsunami would have to reach a height of at least 20 feet at the Golden Gate to overtop San Mateo's levees with a minimum runup of five feet at higher high tide. The highest tsunami affecting the area during the last 120 years had a height of 7.4 feet at the Golden Gate, causing a two-foot runup along the San Mateo shoreline. A seiche is an earthquake induced water wave in a confined body of water, such as swimming pools, water storage tanks, or reservoirs. Even in large bodies of water, seiches typically are less than one foot high. The potential for overtopping of Crystal Springs Reservoir is very remote and would not pose a flooding danger. There are approximately 20 water supply tanks in San Mateo, most of which are covered.

Reporting Standards: No determination is reported because the Public Record does not include a map which delineates the boundaries for this hazard within the City Limits.

FIRE

There are no Wildland fire hazards within City of San Mateo; however to the west of the City there are undeveloped portions of the western hills that are considered wildland fire hazards. These areas are subject to wildland type fires due to existing vegetation, particularly chaparral, the steep slopes and the temperate climate with dry summer months. During the past 27 years only one significant fire has occurred. It burned 20 acres in the Laurel Creek Canyon watershed and caused limited residential damage. Although recent fires have not occurred, these areas pose substantial risks to nearby residences and to the natural environment. All development adjacent to wildlands are required to provide fire retardant roofing materials, adequate site access, and fire breaks of at least 100 feet.

Reporting Standards: No determination is reported because the Public Record does not include a map which delineates the boundaries for this hazard within the City Limits.

JCP-LGS Residential Property Disclosure Reports

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

ADDITIONAL PROPERTY SPECIFIC DISCLOSURES

FORMER MILITARY ORDNANCE SITE DISCLOSURE

DISCUSSION: Former Military Ordnance (FUD) sites can include sites with common industrial waste (such as fuels), ordnance or other warfare materiel, unsafe structures to be demolished, or debris for removal. California Civil Code 1102 requires disclosure of those sites containing unexploded ordnance. "Military ordnance" is any kind of munitions, explosive device/material or chemical agent used in military weapons. Unexploded ordnance are munitions that did not detonate. NOTE: most FUD sites do not contain unexploded ordnance. Only those FUD sites that the U.S. Army Corps of Engineers (USACE) has identified to contain Military Ordnance or have mitigation projects planned for them are disclosed in this report. Additional sites may be added as military installations are released under the Federal Base Realignment and Closure (BRAC) Act. Active military sites are NOT included on the FUD site list.

PUBLIC RECORD: Data contained in Inventory Project Reports, Archives Search Reports, and related materials produced for, and made publicly available in conjunction with, the Defense Environmental Restoration Program for Formerly Used Defense Sites by the U.S. Army Corps of Engineers. Sites for which no map has been made publicly available shall not be disclosed.

REPORTING STANDARD: If one or more facility identified in the Public Record is situated within a one (1) mile radius of the Property, "WITHIN" shall be reported. The name of that facility or facilities shall also be reported.

COMMERCIAL OR INDUSTRIAL ZONING DISCLOSURE

DISCUSSION: The seller of real property who has actual knowledge that the property is affected by or zoned to allow commercial or industrial use described in Section 731a of the Code of Civil Procedure shall give written notice of that knowledge to purchasers as soon as practicable before transfer of title (California Civil Code Section 1102.17). The Code of Civil Procedure Section 731a defines industrial use as areas in which a city and/or county has established zones or districts under authority of law wherein certain manufacturing or commercial or airport uses are expressly permitted. The "Zoning Disclosure" made in this report DOES NOT purport to determine whether the subject property is or is not affected by a commercial or industrial zone. As stated above, that determination is based solely upon ACTUAL KNOWLEDGE of the seller of the subject property.

In an effort to help determine areas where this may be applicable, this disclosure identifies if a property exists within one mile of the seller's property that is zoned to allow for commercial or industrial use. Very commonly, a home will have in its vicinity one or more properties that are zoned for commercial or industrial use such as restaurants, gasoline stations, convenience stores, golf courses, country club etc.

PUBLIC RECORD: Based on publicly-available hardcopy and/or digital zoning and land use records for California cities and counties.

REPORTING STANDARD: If one or more property identified in the Public Record as "commercial," "industrial," or "mixed use" is situated within a one (1) mile radius of the Property, "WITHIN" shall be reported. Please note that an airport facility that may be classified as public use facility in the Public Record will be reported as "commercial/industrial" in this disclosure.

JCP-LGS Residential Property Disclosure Reports

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

AIRPORT INFLUENCE AREA DISCLOSURE

DISCUSSION:

If any portion of the Property is in either an officially designated "airport influence area" ("AIA") or a two mile radius of a qualifying facility for which an AIA has not yet been officially designated, the following Notice is required:

NOTICE OF AIRPORT IN VICINITY

If this property is presently located in the vicinity of an airport, as identified in the determination section of this Report, within what is known as an airport influence area...the property may be subject to some of the annoyances or inconveniences associated with proximity to airport operations (for example: noise, vibration, or odors). Individual sensitivities to those annoyances can vary from person to person. In that case, you may wish to consider what airport annoyances, if any, are associated with the property before you complete your purchase and determine whether they are acceptable (California Civil Code, Section 1103.4)

Certain airports are not disclosed in this report. JCP-LGS has made a good faith effort to identify the airports covered under Section 1102.6a. Sources consulted include official land use maps and/or digital data made available by a governing Airport Land Use Commission (ALUC) or other designated government body. Most facilities for which an Airport Influence Area has been designated are included on the "California Airports List" maintained by the California Department of Transportation's Division of Aeronautics. Not disclosed in this report are public use airports that are not in the "California Airports List", airports that are physically located outside California, heliports and seaplane bases that do not have regularly scheduled commercial service, and private airports or military air facilities unless specifically identified in the "California Airports List". **If the seller has actual knowledge of an airport in the vicinity of the subject property that is not disclosed in this report, and that is material to the transaction, the seller should disclose this actual knowledge in writing to the buyer.**

Most facilities for which an Airport Influence Area has been designated are included on the "California Airports List" maintained by the California Department of Transportation's Division of Aeronautics. The inclusion of military and private airports varies by County, and heliports and seaplane bases are not included, therefore, airports in these categories may or may not be included in this disclosure.

NOTE: Proximity to an airport does not necessarily mean that the property is exposed to significant aviation noise levels. Alternatively, there may be properties exposed to aviation noise that are greater than two miles from an airport. Factors that affect the level of aviation noise include weather, aircraft type and size, frequency of aircraft operations, airport layout, flight patterns or nighttime operations. Buyer should be aware that aviation noise levels can vary seasonally or change if airport usage changes.

PUBLIC RECORD: Based on officially adopted land use maps and/or digital data made publicly available by the governing ALUC or other designated government body. If the ALUC or other designated government body has not made publicly available a current officially adopted airport influence area map, then California law states that "a written disclosure of an airport within two (2) statute miles shall be deemed to satisfy any city or county requirements for the disclosure of airports in connection with transfers of real property."

REPORTING STANDARD: "IN" shall be reported along with the facility name(s) and the "Notice of Airport in Vicinity" if any portion of the Property is situated within either (a) an Airport Influence Area as designated on officially adopted maps or digital data or (b) a two (2) mile radius of a qualifying facility for which an official Airport Influence Area map or digital data has not been made publicly available by the ALUC or other designated governing body. "NOT IN" shall be reported if no portion of the Property is within either area.

JCP-LGS Residential Property Disclosure Reports

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

AIRPORT NOISE DISCLOSURE

DISCUSSION: California Civil Code §1102.17 requires the seller(s) of residential real property who has/have actual knowledge that the property in the transaction is affected by airport use must give written notice of that knowledge, as soon as practicable, before transfer of title.

Under the Federal Aviation Administration's *Airport Noise Compatibility Planning Program* Part 150, certain 65 decibel (dB) Community Noise Equivalent Level (CNEL) contour maps have been produced for some airports. ***Not all airports have produced noise exposure maps. A property may be near or at some distance from an airport and not be within a delineated noise exposure area, but still experience aviation noise. Unless 65dB CNEL contour maps are published, helipads and military sites are not included in this section of the Report.***

The *Airport Noise Compatibility Planning Program* is voluntary and not all airports have elected to participate. Furthermore, not all property in the vicinity of an airport is exposed to 65dB CNEL or greater average aviation noise levels. Conversely a property may be at some distance from an airport and still experience aviation noise. Buyer should be aware that aviation noise levels can vary seasonally or change if airport usage changes after a map is published or after JCP-LGS receives the updated maps within the schedule set by JCP-LGS. JCP-LGS uses the most seasonally conservative noise exposures provided.

Federal funding may be available to help airports implement noise reduction programs. Such programs vary and may include purchasing properties, rezoning, and insulating homes for sound within 65dB areas delineated on CNEL maps. Airport owners have also cooperated by imposing airport use restrictions that include curfews, modifying flight paths, and aircraft limitations.

PUBLIC RECORD: Certain 65 decibel (dB) Community Noise Equivalent Level (CNEL) contour maps produced under the Federal Aviation Administration's *Airport Noise Compatibility Planning Program* Part 150.

REPORTING STANDARD: "IN" shall be reported if any portion of the Property is situated within a 65 decibel Community Noise Equivalent Level contour identified in the Public Record. "NOT IN" shall be reported if no portion of the Property is situated within a 65 decibel Community Noise Equivalent Level contour identified in the Public Record.

Report Date: 05/23/2013
Report Number: 1336416

SAN FRANCISCO BAY CONSERVATION AND DEVELOPMENT COMMISSION DISCLOSURE

DISCUSSION: As of July 1, 2005, Civil Code §1103.4 mandates disclosure to buyers of certain real estate if the boundary of the property is determined to be (1) within 100 feet of the San Francisco Bay shoreline as mapped in 1997 by the National Ocean Survey (NOS), an agency of the National Oceanographic and Atmospheric Administration (NOAA); or (2) within another mapped zone established by the Bay Conservation and Development Commission (BCDC). The BCDC has regulatory jurisdiction within 100 feet inland from the point of "mean higher high water" as mapped by the NOS, and within other zones the agency has defined along the San Francisco Bay margin (BCDC Memo entitled "Guidance on Determining Commission Jurisdiction Pursuant to Senate Bill 1568").

Notice is required to prevent unknowing violations of the law by new owners who were unaware that certain activities on the real property are subject to the BCDC's permit requirements. **The BCDC notes that the Bay is a highly dynamic environment and the shoreline changes over time (see Discussion below). In addition, there is inherent uncertainty in the shoreline position as mapped by the NOS or any agency. The BCDC advises the buyer and other interested parties to contact its office if a more authoritative jurisdictional determination is desired. The BCDC office is located at 50 California Street, Suite 2600, San Francisco, California 94111, and can be reached at (415) 352-3600, or by email to info@bcdc.ca.gov**

The BCDC has issued maps for some parts of its jurisdiction, including the San Francisco Bay Plan maps (California Code of Regulations, Title 14, Section 10121) and the Suisun Marsh Plan maps (Nejedly-Bagley-Z'berg Suisun Marsh Preservation Act of 1974). Official maps have not been issued for other parts of the BCDC jurisdiction (McAteer-Petris Act areas) because the Bay is a highly dynamic environment and the shoreline changes over time (in part because the sea level also changes over time). In those areas where official BCDC maps are not available or along the edges of the BCDC's mapped jurisdiction, to meet the disclosure requirements, this report will indicate that the property "could be within" the BCDC's jurisdiction and that a location-specific jurisdictional determination should be made by consulting the BCDC. This determination of "could be within" the BCDC's jurisdiction was recommended by the BCDC in that certain Memo entitled "Guidance on Determining Commission Jurisdiction Pursuant to Senate Bill 1568" issued in February 2005 and posted on the BCDC website.

PUBLIC RECORDS: San Francisco Bay Plan maps (California Code of Regulations, Title 14, Section 10121) and the Suisun Marsh Plan maps (Nejedly-Bagley-Z'berg Suisun Marsh Preservation Act of 1974) made publicly available by BCDC and that certain Memo entitled "Guidance on Determining Commission Jurisdiction Pursuant to Senate Bill 1568" issued by BCDC in February 2005 and posted on the BCDC website ("BCDC Memo").

REPORTING STANDARD: "WITHIN" shall be reported if any portion of the Property is situated within an areas mapped by BCDC or is within the 100-foot shoreline band. "COULD BE WITHIN" shall be reported if any portion of the Property is situated within one-quarter (1/4) mile of either an area mapped by BCDC or the 100-foot shoreline band. "NOT WITHIN" shall be reported if no portion of the Property is situated within an area that would otherwise be reported as either "WITHIN" or "COULD BE WITHIN."

Report Date: 05/23/2013
Report Number: 1336416

CALIFORNIA ENERGY COMMISSION DUCT SEALING & TESTING REQUIREMENT

DISCUSSION: According to the California Energy Commission ("CEC") most California homes have improperly sealed central air conditioning and heating system ducts such that approximately 30 percent of the conditioned air actually leaks outside the home.

Effective October 1, 2005, in order to combat this waste of energy and money, the CEC set forth new duct sealing and testing requirements in Title 24 of the Building Energy Efficiency Standards. Title 24 requires that, in specific climate zones as designated by the CEC, **when a central air conditioner or furnace is installed or replaced**, homeowners must have ducts tested for leaks. Ducts found to leak more than 15 percent or more must be repaired. Once a contractor tests and fixes these ducts, you must have an approved third-party verifier determine that the ducts have been properly sealed. The CEC cautions homeowners that a contractor who fails to obtain a required building permit and fails to test and repair your ducts "is violating the law and exposing you to additional costs and liability." If you do not obtain a permit, you may be required to bring your home into compliance with code requirements for that work and may incur additional penalties and fines that have to be paid prior to selling your home. Remember that you have a duty to disclose whether you obtained required permits for work performed to prospective buyers and appraisers.

Local governments may mandate more stringent requirements; however, please be advised that duct sealing and associated testing is generally not required:

- if homes are located in specific coastal climates;
- when systems have less than 40 feet of ductwork in unconditioned spaces such as attics, garages, crawlspaces, basements, or outside the building; or
- when ducts are constructed, insulated, or sealed with asbestos.

Please note there are specific alternatives that allow high efficiency equipment and added duct insulation to be installed instead of fixing duct leaks. Please also be advised that there are separate regulations which govern duct insulation levels required by climate zone and HVAC system.

For more information on these requirements, please contact the California Energy Commission or visit the official CEC "2005 HVAC Change-Out Information" portal at <http://www.energy.ca.gov/title24/changeout/>

PUBLIC RECORD: Vector digital rendition of the official "California Building Climate Zone Map" made publicly available by the California Energy Commission ("CEC").

REPORTING STANDARD: "WITHIN" shall be reported if the Property is situated within climate zone 2 or any climate zone 9 through 16 as designated in the Public Record. These are areas wherein duct sealing is "prescriptively required when an air conditioner or furnace is replaced and when new ducts are added or ducts are altered in an existing home." "NOT WITHIN" shall be reported if the Property is situated in climate zone 1 or any climate zones 3 through 8 as designated in the Public Record.

Report Date: 05/23/2013
Report Number: 1336416

STATEWIDE RIGHT TO FARM DISCLOSURE

DISCUSSION:

California has a "Right to Farm Act" (Civil Code Section 3482.5) to protect farming operations. When agricultural land within the State's agricultural areas is bought and sold, the purchasers are often not made aware of the fact that there are right-to-farm laws. This has led to confusion and a misunderstanding of the actual uses of the land or uses of the surrounding agricultural lands.

In 2008 the State of California enacted Assembly Bill 2881 to limit the exposure of farmers to nuisance lawsuits by homeowners in neighboring developments. The mechanism of this bill is a formal notification of the buyer, through a "Notice of Right to Farm" in an expert disclosure report that advises the buyer if the subject property is within one mile of farmland as defined in the bill.

If the seller has actual knowledge of an agricultural operation in the vicinity of the subject property that is not disclosed in this report, and that is material to the transaction, the seller should disclose this actual knowledge in writing to the buyer.

PUBLIC RECORD: Based on the most current available version of the "Important Farmland Map" issued by the California Department of Conservation, Division of Land Resource Protection, utilizing solely the county-level GIS map data, if any, available on the Division's Farmland Mapping and Monitoring Program website, pursuant to Section 11010 of the Business and Professions Code, and Section 1103.4 of the California Civil Code.

REPORTING STANDARD: "IN" shall be reported and the "Notice of Right to Farm" provided if any portion of the Property is situated within, or within one mile of, a parcel of real property designated as "Prime Farmland," "Farmland of Statewide Importance," "Unique Farmland," "Farmland of Local Importance," or "Grazing Land" in the public record. "NOT IN" shall be reported if no portion of the Property is within that area.

Some counties, or parts thereof, are not included in the Public Record because they have not been mapped for farmland parcels under this State program. Typically, this is because the county area is public land and not planned for incorporation, or, in the case of San Francisco, the county is entirely incorporated. In those instances, we report "Map Not Available" above, or "Map N/A" in the table of summary determinations at the beginning of this report.

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

NOTICE OF MINING OPERATIONS DISCLOSURE

If the Property has been determined to be located within one (1) mile of a reported mining operation(s), the following notice is provided as mandated by California law:

NOTICE OF MINING OPERATIONS

This property is located within one mile of a mine operation for which the mine owner or operator has reported mine location data to the Department of Conservation pursuant to Section 2207 of the Public Resources Code. Accordingly, the property may be subject to inconveniences resulting from mining operations. You may wish to consider the impacts of these practices before you complete your transaction.

DISCUSSION: Historically mining operations have been located in remote areas. However, increasing urbanization has resulted in some residential projects being developed near existing mining operations.

California Public Resources Code §2207 requires owners and operators of mining operations to provide annually specific information to the California Department of Conservation ("DOC"), including but not limited to, (i) ownership and contact information, and (ii) the latitude, longitude, and approximate boundaries of the mining operation marked on a specific United States Geological Survey map. The Office of Mining Reclamation ("OMR") is a division of the DOC. Using the mandatory data specified above, OMR provides map coordinate data that can be used by GIS systems to create points representing mine locations ("OMR Maps"). For more information please visit OMR's Mines OnLine Map Viewer (<http://maps.conservation.ca.gov/mol/index.html>).

Effective January 1, 2012, California Civil Code §1103.4 requires the seller of residential property to disclose to a buyer if the residential property is located with one (1) mile of mining operations as specified on OMR Maps.

Special Notes:

1. This statutory disclosure does **not** rely on the OMR's "AB 3098 List," a list of mines regulated under the Surface Mining and Reclamation Act of 1975 ("SMARA") that meet provisions set forth under California Public Resources Code §2717(b). The AB 3098 List does not include map coordinate data as required under California Public Resources Code §2207 and may not include all mining operations subject to the "Notice of Mining Operations" disclosure.
2. This "Notice of Mining Operations" disclosure is not satisfied by disclosing abandoned mines. An abandoned mine is NOT an operating mine. California Civil Code §1103.4 is satisfied only by disclosing based on OMR Maps.

PUBLIC RECORD: Mining operations as provided on OMR Maps made publicly available by DOC pursuant to California law.

REPORTING STANDARDS: "IN" is reported if any portion of the Property is located within a one (1) mile radius of one or more mining operation(s) identified in the Public Record for which map coordinate data is provided. If "IN", the name of the mining operation(s) as it appears in the Public Record is also reported. "NOT IN" is reported if no portion of the Property is located within a one (1) mile radius of a mining operation specified on OMR Maps.

ADVISORIES

REGISTERED SEX OFFENDER DATABASE DISCLOSURE REQUIREMENT ("MEGAN'S LAW")

Notice: Pursuant to Section 290.46 of the Penal Code, information about specified registered sex offenders is made available to the public via an Internet Web site maintained by the Department of Justice at www.meganslaw.ca.gov. Depending on an offender's criminal history, this information will include either the address at which the offender resides or the community of residence and ZIP Code in which he or she resides.

DISCUSSION: California law (AB 488), signed by the Governor on September 24, 2004, provides the public with Internet access to detailed information on registered sex offenders. The Sex Offender Tracking Program of the California Department of Justice (DOJ) maintains the database of the locations of persons required to register pursuant to paragraph (1) of subdivision (a) of Section 290.46 of the Penal Code. The online database is updated with data provided by local sheriff and police agencies on an ongoing basis. It presents offender information in 13 languages; may be searched by a sex offender's specific name, zip code, or city/county; provides access to detailed personal profile information on each registrant; and includes a map of your neighborhood.

California Department of Justice Information Sources:

Megan's Law Sex Offender Locator Web Site: <http://www.meganslaw.ca.gov>

California Department of Justice Megan's Law Email Address: meganslaw@doj.ca.gov

Local Information Locations For The Property:

All sheriffs' departments and every police department in jurisdictions with a population of 200,000 or more are required to make a CD-ROM available free to the public for viewing. Although not required, many other law enforcement departments in smaller jurisdictions make the CD-ROM available as well. Please call the local law enforcement department to investigate availability.

The following are the law enforcement departments in your county that are REQUIRED to make information available:

San Mateo County Sheriff's Department

(650) 363-4060

Explanation and How to Obtain Information

For over 50 years, California has required certain sex offenders to register with their local law enforcement agencies. However, information on the whereabouts of the sex offenders was not available to the public until implementation of the Child Molester Identification Line in July 1995. The available information was expanded by California's "Megan's Law" in 1996 (Chapter 908, Stats. of 1996). Megan's Law provides certain information on the whereabouts of "serious" and "high-risk" sex offenders. The law specifically prohibits using the information to harass or commit any crime against the offender. The information on a registered sex offender includes: name and known aliases; age and sex; physical description, including scars, marks and tattoos; photograph, if available; crimes resulting in registration; county of residence; and zip code (from last registration). Accessing the online database requires agreement to the DOJ's terms of use on the web page.

Report Number: 1336416

GAS AND HAZARDOUS LIQUID TRANSMISSION PIPELINE DATABASE DISCLOSURE REQUIREMENT

DISCUSSION: Following a number of pipeline disasters in the U.S., such as the 2010 San Bruno explosion in Northern California, there is an increased awareness of the potential dangers associated with underground transmission pipelines. As a result, the California Legislature unanimously passed Assembly Bill 1511 (Bradford), signed by Governor Jerry Brown on July 13, 2012. This law, **which becomes effective January 1, 2013**, is chaptered as California Civil Code Section 2079.10.5 and mandates the disclosure of the following notice to homebuyers:

NOTICE REGARDING GAS AND HAZARDOUS LIQUID TRANSMISSION PIPELINES

This notice is being provided simply to inform you that information about the general location of gas and hazardous liquid transmission pipelines is available to the public via the National Pipeline Mapping System (NPMS) Internet Web site maintained by the United States Department of Transportation at <http://www.npms.phmsa.dot.gov/>. To seek further information about possible transmission pipelines near the property, you may contact your local gas utility or other pipeline operators in the area. Contact information for pipeline operators is searchable by ZIP Code and county on the NPMS Internet Web site. (California Civil Code Section 2079.10.5(a))

Civil Code Section 2079.10.5(c) adds, *"Nothing in this section shall alter any existing duty under any other statute or decisional law imposed upon the seller or broker, including, but not limited to, the duties of a seller or broker under this article, or the duties of a seller or broker under Article 1.5 (commencing with Section 1102) of Chapter 2 of Title 4 of Part 4 of Division 2."*

Such "existing duties" include the disclosure of actual knowledge about a potential hazard, such as may be created by the delivery of a letter from the local utility company informing the seller that a gas transmission pipeline exists within 2,000 feet of the Property.

Beginning on the law's January 1, 2013, effective date, except where such "existing duties" apply, "Upon delivery of the notice to the transferee of the real property, the seller or broker is not required to provide information in addition to that contained in the notice regarding gas and hazardous liquid transmission pipelines in subdivision (a). The information in the notice shall be deemed to be adequate to inform the transferee about the existence of a statewide database of the locations of gas and hazardous liquid transmission pipelines and information from the database regarding those locations." (California Civil Code Section 2079.10.5(b))

The disclosure of underground transmission pipelines helps the parties in a real estate transaction make an informed decision and is in the best interest of the public. Buyer should be aware that, according to the NPMS Internet Web site, gas and/or hazardous liquid transmission pipelines are known to exist in 49 of California's 58 counties, the exceptions being in rural mountainous parts of the state. Every home that utilizes natural gas is connected to a gas "distribution" pipeline, which is generally of smaller size and lower pressure than a transmission pipeline.

For More Information

To investigate whether any pipeline easement (right-of-way) exists on the Property, buyer should review the Preliminary Title Report. **Buyer should consult an attorney for interpretation of any law. This notice is for information purposes only and should not be construed as legal advice.**

Report Number: 1336416

METHAMPHETAMINE CONTAMINATED PROPERTY DISCLOSURE ADVISORY

DISCUSSION: According to the "Methamphetamine Contaminated Property Cleanup Act of 2005" a property owner must disclose in writing to a prospective buyer if local health officials have issued an order prohibiting the use or occupancy of a property contaminated by meth lab activity. The owner must also give a copy of the pending order to the buyer to acknowledge receipt in writing. Failure to comply with these requirements may subject an owner to, among other things, a civil penalty up to \$5,000. Aside from disclosure requirements, this new law also sets forth procedures for local authorities to deal with meth-contaminated properties, including the filing of a lien against a property until the owner cleans up the contamination or pays for the cleanup costs.

MOLD ADVISORY

DISCUSSION: The Buyer is hereby advised that naturally occurring molds may exist both inside and outside of any home and may not be visible to casual inspection. Persons exposed to extensive mold levels can become sensitized and develop allergies to the mold or other health problems. Extensive mold growth can damage a structure and its contents. All prospective purchasers of residential and commercial property are advised to thoroughly inspect the Property for mold. Be sure to inspect the Property inside and out for sources of excess moisture, current water leaks and evidence of past water damage.

As part of a buyer's physical inspection of the condition of a property, the buyer should consider engaging an appropriate and qualified professional to inspect and test for the presence of harmful molds and to advise the buyer of any potential risk and options available. This advisory is not a disclosure of whether harmful mold conditions exist at a property or not. No testing or inspections of any kind have been performed by The Company. Any use of this form is acknowledgement and acceptance that The Company does not disclose, warrant or indemnify mold conditions at a property in any way and is not responsible in any way for mold conditions that may exist. Information is available from the California Department of Health Services Indoor Air Quality Section fact sheet entitled, "Mold in My Home: What Do I Do?" The fact sheet is available at www.cal-iaq.org or by calling (510) 620-3620.

The Toxic Mold Protection Act of 2001 requires that information be developed regarding the potential issues surrounding naturally occurring molds within a home. Information was written by environmental authorities for inclusion in the *Environmental Hazards: A Guide for Homeowners, Buyers, Landlords and Tenants* booklet developed by the California Environmental Protection Agency and the Department of Health Services. It is found in Chapter VI of that booklet, and includes references to sources for additional information.

For local assistance, contact your county or city Department of Health, Housing, or Environmental Health.

RADON ADVISORY

DISCUSSION: For its Radon Advisory, JCP-LGS uses the updated assessment of radon exposure published in 1999 by the Lawrence Berkeley National Laboratory (LBNL) and Columbia University, under support from the U.S. Environmental Protection Agency (EPA), the National Science Foundation, and the US Department of Energy (published online at <http://eetd.lbl.gov/IEP/high-radon/USgm.htm>). Based on this recent assessment, JCP-LGS's radon advisory is as follows:

All of California's 58 counties have a predicted median annual-average living-area concentration of radon below 2.0 pCi/L (picocuries per liter of indoor air) -- which is well below the EPA's guideline level of 4 pCi/L and equivalent to the lowest hazard zone (Zone 3) on the 1993 EPA Map of Radon Zones

The "median concentration" means that half of the homes in a county are expected to be below this value and half to be above it. All houses contain some radon, and a few houses will contain much more than the median concentration. **The only way to accurately assess long-term exposure to radon in a specific house is through long-term testing (sampling the indoor air for a year or more).** The EPA recommends that all homes be tested for radon. Columbia University's "Radon Project" website offers help to homeowners in assessing the cost vs. benefit of testing a specific house for radon or modifying it for radon reduction (see <http://www.stat.columbia.edu/radon/>).

NOTE: JCP-LGS does not use the EPA's 1993 map for advisory purposes because that map shows "short-term" radon exposure averaged by county. It was based on "screening measurements" that were intentionally designed to sample the worst-case conditions for indoor air in US homes--using spot checks (sampling for just a few days), in the poorest air quality (with sealed doors and windows), at the worst time of the year (winter), in the worst part of the house (the basement, if one was available). These short-term, winter, basement measurements are both biased and variable compared to long-term radon concentrations (averaged over a year) in the living area of a house. Long-term concentrations are a more accurate way to judge the long-term health risk from radon. For the above reasons, the EPA expressly disclaims the use of its 1993 map for determining whether any house should be tested for radon, and authorizes no other use of its map for property-specific purposes. For additional information about EPA guidelines and radon testing, see "Chapter VII--Radon", in the California Department of Real Estate's *Residential Environmental Hazards: A Guide for Homeowners, Homebuyers, Landlords and Tenants*.

ENDANGERED SPECIES ACT ADVISORY

DISCUSSION: The Federal Endangered Species Act of 1973 ("ESA"), as amended, requires that plant and animal species identified and classified ("listed") by the Federal government as "threatened" or "endangered" be protected under U.S. law. Areas of habitat considered essential to the conservation of a listed species may be designated as "critical habitat" and may require special management considerations or protection. All threatened and endangered species -- even if critical habitat is not designated for them -- are equally afforded the full range of protections available under the ESA.

In California alone, over 300 species of plants and animals have been designated under the ESA as threatened or endangered, and over 80 species have critical habitats designated for them. Most California counties are host to a dozen or more protected species and, in many cases, 10 or more species have designated critical habitats within a county.

ADVISORY: An awareness of threatened and endangered species and/or critical habitats is not reasonably expected to be within the actual knowledge of a seller.

No federal or state law or regulation requires a seller or seller's agent to disclose threatened or endangered species or critical habitats, or to otherwise investigate their possible existence on real property. Therefore, Buyer is advised that, prior to purchasing a vacant land parcel or other real property, Buyer should consider investigating the existence of threatened or endangered species, or designated critical habitats, on or in the vicinity of the Property which could affect the use of the Property or the success of any proposed (re)development.

FOR MORE INFORMATION: Complete and current information about the threatened and endangered species in California that are Federally listed in each county -- including all critical habitats designated there -- is available on the website of the U.S. Fish & Wildlife Service, the Federal authority which has enforcement responsibility for the ESA.

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

ABANDONED MINES ADVISORY

DISCUSSION: According to the California Department of Conservation, Office of Mine Reclamation, since the Gold Rush of 1849, tens of thousands of mines have been dug in California. Many were abandoned when they became unproductive or unprofitable. The result is that California's landscape contains many thousands of abandoned mines, which can pose health, safety, or environmental hazards on and around the mine property. Mines can present serious physical safety hazards, such as open shafts or adits (mine tunnel), and they may create the potential to contaminate surface water, groundwater, or air quality. Some abandoned mines are such massive problems as to earn a spot on the Federal Superfund environmental hazard list.

No California law requires the disclosure of abandoned mines in a real estate transaction, unless the existence of an abandoned mine is within the actual knowledge of the Seller and is deemed to be a fact material to the transaction.

The Office of Mine Reclamation (OMR) and the U.S. Geological Survey maintain a database of abandoned mines -- however, it is known to be incomplete and based on maps that are often decades out of date. Many mines are not mapped because they are on private land. The OMR warns that, *"Many old and abandoned mines are not recorded in electronic databases, and when they are, the information may not be detailed enough to accurately define, differentiate or locate the mine feature, such as a potentially hazardous vertical shaft or horizontal adit or mine waste."* (See reference below.)

Accordingly, this Report does not contain an abandoned mines disclosure from any government database or map or any other source, in order to protect the seller from liability for non-disclosure of unrecorded abandoned mines.

Parties concerned about the possible existence or impact of abandoned mines in the vicinity of the Property are advised to retain a State-licensed geotechnical consultant to study the site and issue a report. Other sources of information include, but are not limited to, the State Office of Mine Reclamation at (916) 323-9198 (website: <http://www.conservation.ca.gov/OMR>), and the Engineering, Planning or Building Departments in the subject City and County.

FOR MORE INFORMATION: For more information visit the State Office of Mine Reclamation's website at: http://www.conservation.ca.gov/omr/abandoned_mine_land/Pages/index.aspx

OIL & GAS WELL ADVISORY

California is currently ranked fourth in the nation among oil producing states. Surface oil production is concentrated mainly in the Los Angeles Basin and Kern County, and in districts elsewhere in the state. In recent decades, real estate development has rapidly encroached into areas where oil production has occurred. Because the state's oil production has been in decline since the 1980's, thousands of oil and gas wells have been shut down or abandoned, and many of those wells are in areas where residential neighborhoods now exist.

According to the California Department of Conservation ("DOC"), to date, about 200,000 oil, gas, and geothermal wells have been drilled in California and around 102,000 are still in use. The majority of remaining wells have been sealed ("capped") under the supervision of the DOC's Division of Oil, Gas and Geothermal Resources. A smaller number have been abandoned and have no known responsible operator -- these are called "orphan" wells. The state has a special fund that pays the cost of safely capping orphan wells, however, that program is limited in its scope and progress.

Buyer should be aware that oil and gas wells, which may include orphan wells, exist in SAN MATEO County. Health and safety hazards may be associated with oil and gas wells, whether orphan, capped or active, including, but not limited to, soil and groundwater contamination, oil and methane seeps, fire hazards, air quality problems, and physical safety hazards to humans and animals.

For More Information

For a search of the state's databases of oil and gas wells and sites of known environmental contamination on or near the Property, please obtain the JCP-LGS Residential EnviroCheck Report™. For general information, visit the California Department of Conservation, Division of Oil, Gas, and Geothermal Resources at <http://www.consrv.ca.gov/dog/>

TSUNAMI MAP ADVISORY

DISCUSSION: The California Emergency Management Agency (CalEMA), the University of Southern California Tsunami Research Center (USC), and the California Geological Survey (CGS) have prepared maps that depict areas of maximum tsunami inundation for all populated areas at risk to tsunamis in California (20 coastal counties). The maps were publicly released in December 2009 with the stated purpose that the maps are to assist cities and counties in identifying their tsunami hazard and developing their coastal evacuation routes and emergency response plans only.

These maps specifically contain the following disclaimer:

Map Disclaimer: This tsunami inundation map was prepared to assist cities and counties in identifying their tsunami hazard. It is intended for local jurisdictional, coastal evacuation planning uses only. This map, and the information presented herein, **is not a legal document and does not meet disclosure requirements for real estate transactions nor for any other regulatory purpose.** The California Emergency Management Agency (CalEMA), the University of Southern California (USC), and the California Geological Survey (CGS) make no representation or warranties regarding the accuracy of this inundation map nor the data from which the map was derived. Neither the State of California nor USC shall be liable under any circumstances for any direct, indirect, special, incidental or consequential damages with respect to any claim by any user or any third party on account of or arising from the use of this map.

A tsunami is a series of ocean waves or surges most commonly caused by an earthquake beneath the sea floor. These maps show the maximum tsunami inundation line for each area expected from tsunamis generated by undersea earthquakes and landslides in the Pacific Ocean. Because tsunamis are rare events in the historical record, the maps provide no information about the probability of any tsunami affecting any area within a specific period of time.

Although these maps may not be used as a legal basis for real estate disclosure or any other regulatory purpose, the CGS has, however, provided diagrams of the maps online which the public can view. To see a maximum tsunami inundation map for a specific coastal community, or for additional information about the construction and/or intended use of the tsunami inundation maps, visit the websites below:

Report Date: 05/23/2013
Report Number: 1336416

METHODS AND LIMITATIONS

This section will summarize (a) the methods used in creating this Report, (b) the limitations with respect to the determination and the Public Record, and (c) the responsibilities and liabilities of JCP-LGS under this Report. Please read this section to fully understand the limitations of this Report and JCP-LGS's responsibilities.

A. LIMITATIONS ON PUBLIC RECORD INFORMATION AND THIS REPORT

JCP-LGS has accurately reported the information in the Public Records with respect to the Property as of the Report Date. With respect to the Public Records, it is important to understand that:

- The Public Records may not be accurate, current, fully detailed, or complete.
- A parcel of real property may be affected by hazards that have not been identified in the Public Records.
- There may be other governmental Public Records with relevant information which are not included in this Report.
- JCP-LGS does not make any representations as to:
 - The significance or extent of any hazard disclosed.
 - Any related health or risk of the hazard to humans or animals or how they may affect the Property.
 - The drinking water sources for the Property.
 - Any information regarding the Property after the Report Date.

B. REPORTING STANDARDS

The Reporting Standards utilized by JCP-LGS in making each determination are specified in the Disclosure Explanations (Sections 1 through 3, inclusive) of this Report. If the Property is near the state border, hazards which may be in the adjoining state or nation are not disclosed in this Report. Where appropriate, JCP-LGS may use the assessor's rolls, cadastral-type maps, photographic enlargements of maps and various cartographic techniques to locate the site on the appropriate map. The respective determination is made as accurately as reasonably possible using these maps. For purposes of defining property lines, the assessor's parcel number and parcel maps are used. Any errors in the assessor's rolls may affect the determination procedures. If the Public Record is not of sufficient accuracy or scale that a reasonable person can determine if the Property is within a delineated hazard area or zone, "IN" or "YES" will be reported for the corresponding disclosure.

If the Property is situated within a condominium project or planned unit development, and if the Property has an undivided fee interest in the common area of said project or development, "IN" or "YES" will be reported for the corresponding disclosure if any portion of that common area is situated within the specified hazard area or zone, *even if the primary lot comprising the Property is not directly affected by that hazard area or zone*. If "IN" or "YES" is reported, the association or owner of such a project or development should be contacted to determine if adequate liability insurance is in place for such hazard(s). Likewise, "IN" or "YES" will be reported if the Property is situated within a mobile home park and if any portion of that park is situated within a specified hazard area or zone, even if the primary lot comprising the Property is not directly affected by that hazard area or zone.

C. NOT AN INSPECTION REPORT

JCP-LGS does not perform a physical examination or any testing of the Property. This Report only provides information electronically derived from the specific Public Record identified for each disclosure in the Disclosure Explanation (Sections 1 through 3, inclusive) of this Report. This Report should not be considered a substitute for an on-site environmental and/or geological or engineering assessment. If additional information is desired, the Parties are encouraged to investigate other sources and to consult an environmental expert, a geologist, an engineer or other expert.

D. CHANGES TO PUBLIC RECORD AFTER REPORT DATE

The Parties are advised that the Public Records may change after the Report Date and JCP-LGS is not responsible for advising the Parties of any changes to the determinations that may occur after the Report Date. As a courtesy, JCP-LGS will update this Report at no cost during the transaction process for which this Report was issued, if requested.

JCP-LGS Residential Property Disclosure Reports

The Natural Hazard Disclosure Report For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA 94402
("Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

E. ONLY THE PARTIES MAY RELY ON THIS REPORT

This Report is valid, the Parties may rely on the Report, and a contract is formed with JCP-LGS, **only** upon receipt by JCP-LGS of payment of the full price of the Report. This Report may be relied upon only by the Parties to the transaction for which it has been purchased. This Report cannot be relied upon (a) by any persons other than the Seller, the Buyer and their Agents, (b) for any other real property, (c) for any future transactions involving the Property, or (d) for any real property which is not 1-4 family residential property. The price paid for the Report does not include any amounts for protection of such other parties.

F. ERRORS AND OMISSIONS INSURANCE

JCP-LGS maintains errors and omissions insurance. As of the Report Date, JCP-LGS has \$20M aggregate in errors and omissions insurance.

G. LIMITATIONS ON JCP-LGS'S LIABILITY

JCP-LGS is not responsible for:

- Any inaccuracies or incompleteness of the information in the Public Records.
- Inaccurate address information provided for the Property.
- Any other information not contained in the specified Public Records as of the Report Date.
- Any information which would be disclosed by a physical inspection of the Property.
- Any information known by one of the Parties.
- The health or risk to humans or animals that may be associated with any of the disclosed hazards.
- The costs of investigating or remediating any of the disclosed hazards.

This Report is not an insurance policy and does not provide the same protections as an insurance policy. The price of this Report has been established with the understandings of the responsibilities of JCP-LGS as set forth in this Section. The premium for an insurance policy would be significantly greater than the cost of this Report. The Parties acknowledge that claims for damages beyond actual losses can significantly increase the costs of Reports and make prompt resolution of claims more difficult. In order to induce JCP-LGS to provide this Report for the price charged, and to help streamline the process of resolving any disputes between the Parties and JCP-LGS, the Buyer, Seller and Agents agree that if there is a material error or omission in this Report:

- **The Party who suffers damages as a result of such error or omission shall be entitled at most to recover from JCP-LGS the actual proved damages measured by the difference in the fair market value of the Property as of the Report Date, caused by the error or omission but not in excess of sale price of the Property to the Buyer. The Party making such claim must notify JCP-LGS promptly of such claim, take no action which will adversely affect JCP-LGS's liability or defenses to such claim and the Party must fully cooperate with JCP-LGS in the defense of such claim. The Party shall cooperate with providing reasonable evidence of the claim as requested by JCP-LGS.**
- **JCP-LGS shall not be liable for indirect, consequential, personal injury, physical damage or punitive damages (including, but not limited to, emotional distress or pain and suffering).**
- **JCP-LGS will defend the Parties regarding a claim made in accordance with the foregoing provisions. JCP-LGS shall have the right to choose the legal counsel and control the defense of such claim as it reasonably determines.**
- **JCP-LGS shall be subrogated to all rights of the claiming Party against anyone including, but not limited to, another Party who had actual knowledge of a matter and failed to disclose it to the other Parties in writing prior to the Sale Date.**

H. SELLER AND SELLER'S AGENT'S RESPONSIBILITY OF FULL DISCLOSURE

Sellers of real property and their agents should always fully disclose all material facts regarding the real property which they are selling. Regardless of the information in this Report, if Seller or Seller's Agent has any actual knowledge of hazards potentially affecting the Property, that information should be promptly disclosed in writing to the Buyer and the Buyer's Agent.

I. OTHER AGREEMENTS

This Report sets forth the complete, integrated agreement between JCP-LGS and the Parties. Evidence of prior or contemporaneous statements, representations, promises or agreements shall not be admissible to vary the terms of this written agreement. This agreement may not be changed or amended except by a written document signed by an authorized representative of JCP-LGS and the Parties. In the event that any dispute arises between JCP-LGS and any Parties arising out of or relating to this Report or its subject matter, or any act or omission of JCP-LGS, the prevailing party shall be entitled to recover his, her or its reasonable costs, including attorneys' fees, from the losing party.

ADDENDUM

SAN FRANCISCO INTERNATIONAL AIRPORT UPDATED AIRPORT INFLUENCE AREAS AND 65dB NOISE CONTOUR

On November 9, 2012 the Board of the San Mateo City/County Association of Governments adopted an updated Comprehensive Airport Land Use Plan for San Francisco International Airport. As a result of this update:

- San Mateo County in its entirety is now located within **Airport Influence Area A** subject to statutory Notice of Airport real estate transfer disclosure.
- Significant portions of the county proximate to San Francisco International Airport are also located within the newly designated **Airport Influence Area B** for which real estate transfer disclosure is also required.
- **CNEL 65dB** (decibel) and other noise contours for this facility have been modified.

For current information, please refer to the "Airport Influence Area Disclosure" and "Airport Noise Disclosure" contained in the previous section of this Report.

California Property Tax Disclosure Report™

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

California Property Tax Disclosure Report™

The parties for whom this Report was prepared are the owner ("Seller") of the Residential Property ("Property") on the Report Date, the buyer ("Buyer") of the Residential Property from Seller as of the Report Date and their respective licensed real estate agents ("Agents"). Seller, Buyer and the Agents are sometimes referred to herein as "Party" or "Parties."

PART 1. INTRODUCTION AND SUMMARY:

This Report discloses the results of an electronic search of specified government lists ("Databases") containing real property tax information and geographic data concerning the Residential Property. To understand the information provided, please read this entire Report.

The Residential Property:

- A. IS ☐ IS NOT ☒ Subject to one or more Mello-Roos Community Facilities Districts.
- B. IS ☐ IS NOT ☒ Subject to one or more 1915 Bond Act Assessment Districts.
- C. IS ☒ IS NOT ☐ Subject to other direct assessments.
- D. IS ☐ IS NOT ☒ Subject to SRA Fire Prevention Fee

For more detailed information as to the foregoing determinations, please review Parts 2 and 3 and 6.

THIS IS A DATABASE REPORT ONLY: The tax information in this Report only provides information derived from County Tax Assessor's Databases ("Databases") identified in this Report. While JCP-LGS has made good faith efforts to report from the Databases as accurately as possible, the quality, accuracy, and currency ("Database Date") of the information contained in these Databases can vary greatly. For more information regarding a specific Database, please read Part 2 of this Report.

LIABILITY PROTECTIONS: Upon consummation of the sale of the Residential Property to Buyer ("Sale Date"), the Parties involved in that sale are protected against loss caused by an error in this Report as specified in Part 8 entitled "Methods and Limitations." The Parties understand that this is a report product and not an insurance policy.

This Report satisfies Seller's obligations to disclose (a) Mello-Roos and 1915 Act Bond Assessments applicable to the Residential Property as required by California Civil Code Section 1102.6b, and (b) Supplemental Taxes as required by California Civil Code Section 1102.6c.

BUYER'S ACKNOWLEDGEMENT

Buyer(s) acknowledge(s) receipt of this California Property Tax Disclosure Report™ as well as the Notice of Special Tax and Assessment contained herein by his/her/their signature(s) on the Natural Hazard Disclosure Statement (NHDS) Form that is a part of this report package.

Report Date: 05/23/2013
Report Number: 1336416

PART 2. NOTICE OF SPECIAL TAX/ASSESSMENT

TO THE PROSPECTIVE PURCHASER OF THE RESIDENTIAL PROPERTY AT THE ADDRESS REFERENCED ABOVE:

THIS IS A NOTIFICATION TO BUYER PRIOR TO PURCHASING THE RESIDENTIAL PROPERTY.

A. Mello-Roos Community Facilities Districts:

If the Residential Property is within a Mello-Roos Community Facilities District (CFD), it is subject to a special tax that will appear on the property tax bill. This special tax is in addition to the ad valorem property taxes and any other charges and benefit assessments that will be itemized on the property tax bill and the proceeds of this tax or assessment are used to provide public facilities or services that are likely to particularly benefit the real property. This special tax may not be imposed on all parcels within the city or county where the property is located.

The current tax levy, maximum tax levy, the maximum tax escalator, and the authorized facilities and/or services which are being paid for by the special taxes are indicated below. THE BUYER SHOULD TAKE THIS TAX AND THE BENEFITS FROM THE PUBLIC FACILITIES AND SERVICES FOR WHICH IT PAYS INTO ACCOUNT IN DECIDING WHETHER TO BUY THE RESIDENTIAL PROPERTY.

This Residential Property **is NOT SUBJECT to** Mello-Roos Community Facilities Districts

B. 1915 Bond Act Assessment Districts:

If the Residential Property is within a 1915 Bond Act Assessment District, this assessment district has issued bonds to finance the acquisition or construction of certain public improvements that are of direct and special benefit to all real property within the assessment district. The bonds will be repaid from annual assessment installments against the property within the assessment district.

Annual assessment installments of such an assessment district will appear on the real property tax bills and are in addition to the ad valorem property taxes and any other charges and levies that will be itemized on the property tax bill. If the assessment installments are not paid when due each year, the Residential Property may be foreclosed upon and sold.

The annual assessment installment against the Residential Property and the public facilities that are being financed by the proceeds from the sale of bonds that are being repaid by the assessments are indicated below.

THE BUYER SHOULD TAKE ANY ASSESSMENT(S) AND THE BENEFITS FROM THE PUBLIC FACILITIES FOR WHICH IT PAYS INTO ACCOUNT IN DECIDING WHETHER TO BUY THE RESIDENTIAL PROPERTY.

This Residential Property **is NOT SUBJECT to** 1915 Bond Assessment Districts

A COPY OF THE RESOLUTION CONFIRMING ASSESSMENTS THAT SPECIFIES MORE PRECISELY HOW THE ASSESSMENTS ARE APPORTIONED AMONG PROPERTIES IN THE ASSESSMENT DISTRICT CAN BE

OBTAINED BY CALLING THE CONTACT NAME AND NUMBER LISTED ABOVE. THERE MAY BE A CHARGE FOR THIS DOCUMENT NOT TO EXCEED THE ESTIMATED REASONABLE COST OF PROVIDING THE DOCUMENT

C. Accelerated Foreclosure Information

Certain assessment or bond issues may contain accelerated foreclosure liens which have priority over other real property taxes and are a legal right included as part of the security for the obligation. The issuers of such bonds are often contractually required to monitor and collect delinquent assessments quickly. Accordingly these assessments are not subject to the five (5) year waiting period applicable to ad valorem real property taxes. If the real property is subject to such an assessment and the taxes are not paid promptly, the real property may be foreclosed upon and sold at public auction on an expedited basis. **Therefore, it is extremely important that the real property tax bill be paid on time to prevent the accelerated foreclosure.**

PART 3. CURRENT PROPERTY TAX BILL SUMMARY

A. Summary of 2012-2013 Property Tax Bill

The following is a summary of Database information obtained from the SAN MATEO COUNTY Secured Property Tax Roll for Tax Year 2012-2013 ("Database Date"). This summary is provided for informational purposes only. The summary includes Ad Valorem taxes which are based on the property's Assessed Value as well as other Non- Ad Valorem Direct or Special Assessments. Upon transfer of ownership, the Assessed Value may be reset to the Current Market Value or Sale Price which can result in a substantial change in the Ad Valorem taxes assessed. Please see Parts 4 and 5 of this Report for more information regarding Ad Valorem taxes and Supplemental taxes.

Total Assessed Value:	\$1,491,168
1 st Installment Due 11/01/2012	\$ 8,841.49
2 nd Installment Due 03/01/2013	\$ 8,841.49

B. Available Senior Citizen Exemptions

Certain districts that levy special taxes or assessments may offer exemptions to Senior Citizens. These exemptions can result in substantial savings to qualified tax payers. The filing of an application along with annual renewal may be required. Below is the contact information for requesting details on filing exemptions for districts that may offer a Senior Citizen Exemption. Additional Direct Assessment Districts may offer exemptions. Therefore you may want to contact the districts to determine their policy on Senior Citizen Exemptions

PART 4. ESTIMATING PROPERTY TAXES AFTER THE SALE

A. CALCULATING PROPERTY TAXES AFTER SALE (ESTIMATE ONLY)

PROPERTY TAX ESTIMATOR

The following calculation method is provided to assist Buyer in *estimating* the approximate amount of property tax charges that the Residential Property may be subject to for the upcoming tax year based on the assessed valuation being equal to the sales price. The amount derived is only an estimate and is not a substitute for a tax bill from the County, nor does it anticipate new property tax charges, fees or other changes in the property tax rates for future tax years.

1	Estimated Sales Price.....•	1	\$ _____
2	Estimated Ad Valorem Tax Rate•	2	<u>0.01104</u>
3	Multiply line 1 by line 2. This is your Estimated Ad Valorem Tax.....•	3	\$ _____
4	Direct Assessments including Mello Roos Special Taxes and 1915 Bond Assessments if applicable.....•	4	<u>\$1,217.52</u>
5	Add lines 3 and 4. Total Estimated Annual Tax Amount After Sale •	5	\$ _____

The information in this subparagraph A is an estimate only. The purpose of this "ESTIMATOR" is to assist Buyer in planning for property taxes which will be applicable after the Sale Date. This "ESTIMATOR" requires the Buyer's projection of the purchase price of the Residential Property. Please note that potential exemptions and exclusions are not reflected in this estimate. Additionally, undeveloped or recently developed properties may be subject to additional Direct Assessments not included in this estimate. JCP-LGS is not responsible or liable for any losses, liabilities or damages resulting from use of this Property Tax Estimator.

B. EXEMPTIONS & EXCLUSIONS TO AD VALOREM TAXES

California law provides certain exemptions from reassessments. The following is a list of common exemptions which may be available:

- Homeowner exemption (California Constitution Art XIII, §3 & R&T Code §218)
- Honorably discharged veterans (California Constitution Art XIII, §3 & R&T Code §205)
- Disabled veterans (California Constitution Art XIII, §4 & R&T Code §205)

California law also provides certain exclusions from reassessment. The following is a list of common exclusions which may be available:

- Persons over 55 years of age (R&T Code § 69.5)
- Severely and permanently disable persons (R&T Code § 69.5(a))
- Transfers between parents and children and grandparents and grandchildren (R&T Code § 63.1)
- Transfers into revocable trusts (R&T Code § 62)
- Interspousal transfers (R&T Code § 63)
- Improvements for seismic retrofitting (R&T Code § 74.5)
- Improvements for disabled access (R&T Code § 74.3)
- Replacement of property damaged or destroyed by disaster (R&T Code § 69)

California Property Tax Disclosure Report TM

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

In order to determine if Buyer may qualify for any exemptions or exclusions or to obtain a comprehensive list of available exemptions and exclusions, please contact the county tax assessor's office ((650) 363-4142) or visit the county website at <http://www.smcare.org/assessor/default.asp>. Additional information is also available on the website for the California Board of Equalization at www.boe.ca.gov

PART 5. SUPPLEMENTAL TAX INFORMATION

A. GENERAL INFORMATION REGARDING SUPPLEMENTAL TAXES

California law mandates the county assessor to reappraise real property upon a change in ownership or completion of new construction. The assessor's office issues a supplemental assessment which reflects the difference between the prior assessed value and the new assessment. This value is prorated based on the number of months remaining in the fiscal tax year which ends June 30.

Notices of the supplemental assessment are mailed out to the property owners prior to the issuance of the supplemental tax bill or refund if the value is reduced. The taxes or refund based on the supplemental assessment are in addition to the regular annual tax bill.

The supplemental tax will be due from the current owner in addition to the regular tax assessment. Accordingly for the first year of ownership, Buyer should plan for this additional payment.

B. SUPPLEMENTAL TAX DISCLOSURE

The following notice is mandated by California Civil Code Section 1102.6c:

NOTICE OF YOUR 'SUPPLEMENTAL' PROPERTY TAX BILL

"California property tax law requires the Assessor to revalue real property at the time the ownership of the property changes. Because of this law, you may receive one or two supplemental tax bills, depending on when your loan closes.

The supplemental tax bills are not mailed to your lender. If you have arranged for your property tax payments to be paid through an impound account, the supplemental tax bills will not be paid by your lender. It is your responsibility to pay these supplemental bills directly to the Tax Collector.

If you have any question concerning this matter, please call your local Tax Assessor or Collector's Office."

SAN MATEO County Assessor

C. CALCULATING SUPPLEMENTAL TAXES AFTER SALE (ESTIMATE ONLY)

SUPPLEMENTAL TAX ESTIMATOR

The following schedule is provided to **estimate** the potential amount of the **supplemental taxes** on a given property and does **NOT** include the amount of the regular annual ad valorem property tax. The following calculation provides an estimate of the supplemental property taxes that can be expected during the first year of ownership, and should be used for planning purposes only.

- 1 Estimated Sales Price.....● 1 \$ _____
- 2 Estimated Current Assessed Value● 2 \$1,491,168
- 3 Subtract line 2 from line 1.
Estimated Supplemental Assessed Value● 3 \$ _____
- 4 Multiply line 3 by 0.01104. (The Estimated Ad Valorem Tax Rate
for the Residential Property)
Estimated Full-Year **Supplemental** Tax Obligation● 4 \$ _____

If the Sale Date for the Residential Property falls during the months of January through May, Buyer will receive **TWO** supplemental tax bills: (a) one for the current partial tax year; and (b) one for the next full tax year. The supplemental taxes can be estimated by completing lines 5 through 8 below:

- 5 Enter the Month-of-Sale Factor from **TABLE 1** below.....● 5 _____
- 6 Multiply line 4 by line 5.
Estimated Supplemental Tax Bill # 1● 6 \$ _____
- 7 Enter the amount on line 4.
Estimated Supplemental Tax Bill # 2● 7 \$ _____
- 8 Add lines 6 and 7. Total estimated Supplemental Tax Bill.....● 8 \$ _____

If the Sale Date for the Residential Property falls during the months of June through December, Buyer will receive **ONE** supplemental tax bill. The supplemental tax can be estimated by completing lines 9 and 10 below:

- 9 Enter the Month-of-Sale Factor from **TABLE 2** below.....● 9 _____
- 10 Multiply line 4 by line 9.
Total Estimated Supplemental Tax Bill● 10 \$ _____

TABLE 1. Month-of-Sale Factor

Jan	0.4167
Feb	0.3333
Mar	0.2500
Apr	0.1667
May	0.0833

TABLE 2. Month-of-Sale Factor

Jun	1.0000
Jul	0.9167
Aug	0.8333
Sep	0.7500
Oct	0.6667
Nov	0.5833
Dec	0.5000

The information in this subparagraph C is an estimate only. The purpose of this "ESTIMATOR" is to assist Buyer in planning for the supplemental taxes. The estimated supplemental tax is not a substitute for the supplemental bill and may not be relied upon as such. This "ESTIMATOR" requires the Buyer's projection of the purchase price of the Residential Property as well as month in which the transaction will be consummated. Please note that potential exemptions and exclusions are not reflected in these estimations. JCP-LGS is not responsible or liable for any losses, liabilities or damages resulting from use of this Supplemental Tax Estimator.

California Property Tax Disclosure Report TM

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

PART 6. STATE RESPONSIBILITY AREA FIRE PREVENTION FEE

Pursuant to Chapter 1.5 (commencing with Section 4210) to Part 2 of Division 4 of the Public Resources Code, the State of California shall charge an annual "Fire Prevention Benefit Fee" ("Benefit Fee") on each eligible habitable structure on a parcel that is within a State Responsibility Area ("SRA") as defined in Section 4102 of the Public Resources Code, commencing with the 2011-2012 fiscal year. For an explanation of the SRA, refer to Page 10 of the Natural Hazard Disclosure Report, under "Wildland Fire Area (State Responsibility Area)". The Fee Amount and a Fee Exemption (explained below) were implemented in an emergency regulation adopted January 23, 2012 by the State Board of Forestry and Fire Protection ("Board").

Fee Amount: A Benefit Fee of one hundred-fifty dollars (\$150) shall be charged on each habitable structure within an SRA, including single-family homes, multi-dwelling structures, mobile and manufactured homes, and condominiums. This is **not** a "per parcel" fee, but a levy on each structure (if any) on the parcel within an SRA which the State determines to be habitable.

Fee Exemption: Property owners of habitable structures within a SRA and also within the boundaries of a local agency that provides fire protection services shall receive a fee reduction of thirty-five dollars (\$35) per habitable structure.

Date Due and Late Payment Penalties

The fee shall be collected annually by the State Board of Equalization ("BOE"), and is due and payable 30 days from the date of assessment by the BOE. If not paid when due and payable, a penalty of twenty percent (20%) of the fee determined to be due shall be added to the amount due and payable for EACH 30-day period in which the fee remains unpaid.

The fees collected, other than that retained by the BOE necessary for payment of refunds and expenses incurred in the collection of the fee, shall be deposited into the State Responsibility Area Fire Prevention Fund in the State Treasury. This Fund shall be used by the Board and the Department of Forestry and Fire Protection ("CalFire") to finance the cost of specified fire prevention activities that will benefit the owners within the SRA who are required to pay the fee, including such activities as public education programs and local fire prevention projects to reduce fire risk in SRAs.

On July 1, 2013, and annually thereafter, the Board shall adjust the annual amount of the Fire Prevention Fee to reflect the percentage of change in the average annual value of a specified standard price index as reported by the Department of Finance. Commencing with the 2012-13 fiscal year, if there are sufficient amounts of moneys in the SRA Fire Prevention Fund to finance the costs of specified fire prevention activities for a fiscal year, the BOE would be prohibited from collecting the fee for that fiscal year.

Appeals Process: A person from whom the Benefit Fee is to be due may petition for a redetermination of whether this fee requirement applies to the Property. To appeal, the owner must submit within 30 days after the date of service of the determination a written petition stating the specific grounds upon which the appeal is founded and include supporting documentation. The petition must be sent to the address indicated by CalFire which may be the address of CalFire's Designated Fee Administrator.

Database Date: August 2012

This property is **not located in a State Responsibility Area**.

PART 7. PRIVATE TRANSFER FEE ADVISORY: DISCLOSURE REQUIRED EFFECTIVE JAN. 1, 2008

Private Transfer Fee. This is a fee imposed by a private entity such as a property developer, home builder, or homeowner association, when a property within a certain type of subdivision is sold or transferred. (It is commonly known as a "Private Transfer Tax".) It is NOT the same as a city or county Documentary Transfer Tax. A Private Transfer Fee may apply in addition to government Documentary Transfer Taxes that are due upon sale or transfer of the Property.

Transfer Fee Defined. California Civil Code Section 1098 defines a "Transfer Fee" as "any fee payment requirement imposed within a covenant, restriction, or condition contained in any deed, contract, security instrument, or other document affecting the transfer or sale of, or any interest in, real property that requires a fee be paid upon transfer of the real property." Certain existing fees such as governmental fees, court ordered fees, mechanic lien fees, common interest development fees, etc. are specifically excluded from the definition of "Transfer Fee."

Effective January 1, 2008, if the payment of any Transfer Fee is required in the sale or transfer of the Property, Civil Code Section 1102.6e requires Seller to notify Buyer of the existence of the fee and to disclose certain specific information about the fee.

Content of Disclosure. Civil Code Section 1102.6e requires the Seller to disclose specific information about any Transfer Fee that may affect the Property. If a Private Transfer Fee affects the Property, refer to C.A.R. Form NTF (11/07), provided by the California Association of Realtors®, for a standard format to use in making the Transfer Fee disclosure.

How to Determine the Existence of a Transfer Fee. If a Transfer Fee does exist affecting the Property, the document creating the fee may be on file with the County Recorder as a notice recorded against the Property and should be disclosed in the preliminary (title) report on the Property. However, the preliminary (title) report will merely disclose the existence of the documents affecting title, not the content of the documents. The title of a document may also not be sufficient to disclose that a Transfer Fee is included in its terms. Accordingly Seller should (a) request the title company which issued the preliminary (title) report to provide copies of the documents shown as "exceptions," and (b) review each document to determine if it contains a Transfer Fee.

Parties are advised that documents regarding any Transfer Fee should be obtained early in the sale process in order to avoid delays in the transaction process and to ensure full disclosure as required by law.

It is estimated that fewer than 1 in 10 California homes is subject to a Private Transfer Fee. To determine if the Property is subject to a Transfer Fee, OBTAIN COPIES OF ALL OF THE EXCEPTIONS LISTED ON THE PRELIMINARY (TITLE) REPORT FROM THE TITLE COMPANY AND READ THEM TO DETERMINE IF ANY TRANSFER FEES ARE APPLICABLE.

California Property Tax Disclosure Report TM

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

PART 8. METHODS AND LIMITATIONS -- PLEASE READ!

This Part will summarize (a) the methods used in creating this Report, (b) the limitations with respect to the data provided, and (c) the responsibilities and liabilities of JCP-LGS under this Report. Please read this entire Part 8 carefully to understand the limitations of this Report and JCP-LGS's responsibilities.

A. LIMITATIONS ON TAX INFORMATION

JCP-LGS has accurately reported the information in the Databases as of the dates of each Database as specified in Part 2 ("Database Dates"). With respect to the Databases, it is important to understand that:

- The Databases may not be accurate, current, fully detailed, or complete.
- A parcel of real property may be subject to an assessment district that has been approved but not created as of the Report Date.
- Changes may have occurred in the Databases since the Database Date specified above.
- There may be other governmental databases with relevant information which are not included in this Report.
- Personal property taxes are not included in this Report.
- Supplemental taxes can be assessed based on improvements to the real property after they have been completed and the assessor becomes aware of same. Supplemental taxes are **not** included in the Databases.
- Assessment districts which have been created but not funded are not included.

B. JCP-LGS DOES NOT CONSTANTLY CHECK DATABASES FOR CHANGES

Each Database used in this Report is updated by the applicable governmental agency at various intervals as determined by that agency having responsibility for the database ("Responsible Agency") and may be updated at any time and without notice. JCP-LGS maintains an update schedule and makes reasonable efforts to use updated information but it cannot feasibly do so on a constant basis, and the complexities of obtaining and adapting the data into a usable format for preparing this Report necessitates some delay once the updated information is obtained. For these reasons, JCP-LGS reports information as of the date when the Database was last updated by JCP-LGS which specific date is specified as the "Database Date" for each Database in Part 2.

C. LIMITATIONS IN THIS REPORT

JCP-LGS does not make any representations as to:

- The accuracy, validity or completeness of the Databases.
- Any information in a Database after the Database Date for that Database.
- Any information regarding the Residential Property after the Report Date.

This Report only provides information electronically derived from the Databases in accordance with the Methods and Limitations.

D. ONLY THE PARTIES MAY RELY ON THIS REPORT

This Report is valid, the Parties may rely on the Report, and a contract is formed with JCP-LGS, **only** upon receipt by JCP-LGS of payment of the full price of the Report.

This Report may be relied upon only by the Parties to the transaction for which it has been purchased. This Report cannot be relied upon (a) by any persons other than Seller, Buyer and their Agents, (b) for any other real property, or (c) for any future transactions involving the Residential Property. The price paid for the Report does not include any amounts for protection of such other parties.

California Property Tax Disclosure Report TM

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO COUNTY, CA

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

E. LIMITATIONS ON JCP-LGS'S LIABILITY

Given the limited nature of this Report, and the fact that JCP-LGS is reporting, not assuming liability, JCP-LGS is not responsible for:

- Any inaccuracies or incompleteness of the information in the Databases.
- Inaccurate address information provided for the Residential Property.
- Any other information not contained in the specified Databases.
- Any information known by one of the Parties.
- Any changes to the information in the Databases after the Database Date.

This Report is not an insurance policy and does not provide the same protections as an insurance policy. It does not obligate JCP-LGS to defend any Party against any claims, and JCP-LGS shall not have any duty to defend against any claims pursuant to California Civil Code § 2778 or otherwise. The price of this Report has not been based upon any responsibility for defense costs, nor for assumption of all tax liability. The premium for an insurance product would be significantly greater than the cost of this Report. The Parties acknowledge that claims for damages beyond actual losses can significantly increase the costs of Reports and make prompt resolution of claims more difficult. In order to induce JCP-LGS to provide this Report for the price charged, and to help streamline the process of resolving any disputes between the Parties and JCP-LGS, Buyer, Seller and Agents agree that if there is a material error or omission in this Report:

- **The Party who suffers damages as a result of such error or omission shall be entitled at most to recover from JCP-LGS the actual proved damages measured by the difference in the fair market value of the Residential Property as of the Report Date, caused by the error or omission but not in excess of the present value of the total tax amount under-reported which would payable for a five (5) year period.**
- **JCP-LGS shall not be liable for indirect, consequential, or punitive damages (including, but not limited to, emotional distress or pain and suffering).**

JCP-LGS shall not be liable to a Party for any matters known to that Party or its Agent (including errors in this Report) and not disclosed in writing to both the other Parties and JCP-LGS prior to the date the Residential Property is sold by Seller to Buyer.

F. SELLER AND SELLER'S AGENT'S RESPONSIBILITY OF FULL DISCLOSURE

Sellers of real property and their Agents should always fully disclose all material facts regarding the real property which they are selling. Regardless of the information in this Report, if Seller or Seller's Agent has any actual knowledge of tax information potentially affecting the Residential Property, that information should be promptly disclosed in writing to the Buyer and the Buyer's Agent.

G. OTHER AGREEMENTS

This Report sets forth the complete, integrated agreement between JCP-LGS and the Parties. Evidence of prior or contemporaneous statements, representations, promises or agreements shall not be admissible to vary the terms of this written agreement. This agreement may not be changed or amended except by a written document signed by an authorized representative of JCP-LGS and the Parties. In the event that any dispute arises between JCP-LGS and any Parties arising out of or relating to this Report or its subject matter, or any act or omission of JCP-LGS, the prevailing party shall be entitled to recover his, her or its reasonable costs, including attorneys' fees, from the losing party.

If any provision of this Report, or its application to any circumstance, is held to be invalid, unenforceable, or void, the remainder of this Report shall remain in full force and effect and enforced to the fullest extent possible.

JCP-LGS Residential Property Disclosure Report The EnviroCheck Report™ For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO County, CA 94402
("Residential Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

INTRODUCTION AND SUMMARY

The parties to the Transaction to which this Report applies ("Parties") are the owner of the Residential Property on the Report Date ("Seller"), the buyer of the Residential Property under contract of sale as of the Report Date ("Buyer") and their respective licensed real estate agents ("Agents"). JCP-LGS and the Parties are the parties to the contract that is entered into by the purchase of this Report.

SUMMARY OF DETERMINATIONS

The Residential Property:

- IS ☒ IS NOT ☐ within ¼ mile of 3 known leaking underground storage tank Site(s).
- IS ☐ IS NOT ☒ within one (1.0) mile of a "Superfund" or RCRA Corrective Action site(s).
- IS ☐ IS NOT ☒ within ½ mile of Site(s) other than those above that are listed in the databases specified in the Explanation of Databases Used in this Report.
- IS ☐ IS NOT ☒ within ¼ mile of a mapped oil or gas well(s).
- IS ☐ IS NOT ☒ within 2,000 feet of a Gas Transmission or Hazardous Liquid Pipeline(s) depicted in the National Pipeline Mapping System.

For more detailed information as to the foregoing determinations, please read this entire report.

JCP-LGS prepared this Report. The Parties are protected by JCP-LGS's Professional Liability Insurance Policy for damages to the extent they are caused by JCP-LGS's negligent acts, errors or omissions in the performance of our services and subject to the limitations of this report.

Determined by JCP-LGS Disclosure Reports.

Greg Rufe, Chief Operating Officer
JCP-LGS Disclosure Reports

IMPORTANT: ACKNOWLEDGING RECEIPT OF THIS REPORT INDICATES THAT THE RECIPIENT HAS READ AND UNDERSTANDS THE "ABOUT THIS REPORT" PROVISIONS ON PAGE 2.

BUYER'S ACKNOWLEDGEMENT

Buyer(s) acknowledge(s) receipt of this EnviroCheck Report™ by his/her/their signature(s) on the Natural Hazard Disclosure Statement (NHDS) Form that is a part of this report package.

JCP-LGS Residential Property Disclosure Report The EnviroCheck Report™ For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO County, CA 94402
("Residential Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

ABOUT THIS REPORT

THIS IS A DATABASE REPORT ONLY: This Report only provides information from the Databases identified in this Report. While JCP-LGS has made good faith efforts to report from the Databases as accurately as possible, the quality, accuracy, and currency of the information contained in these Databases can vary greatly. For more information regarding a specific Database, please read the section below entitled "Explanation of Databases Used."

NOT AN INSPECTION REPORT: This Report is not the same thing as a physical inspection report or a full environmental assessment report. JCP-LGS has not physically inspected the Residential Property nor the Sites. This Report only summarizes the information from governmental Databases using the Point Source methodology described below to determine the proximity of Sites to the Residential Property.

LIABILITY PROTECTIONS: Upon purchase of this report and consummation of the sale of the Residential Property to Buyer ("Sale Date"), the Parties involved in that sale are protected against loss caused by any error in this Report as specified in the section below entitled "Methods and Limitations."

NOT AN INSURANCE POLICY: This Report is a binding contract but is not an insurance policy. The price charged for the Report does not cover the costs that would be necessary to provide all of the protections of an insurance policy.

UNDERSTANDING THIS REPORT: To understand the information in this Report, it is important to read the entire Report.

POINT AND LINE SOURCE METHODOLOGY: This Report does not identify the precise areas actually contaminated by an environmental hazard; rather, as a reasonable approximation, it identifies as "point sources" for contamination those Sites identified in a specific Database, such as a leaking underground tank on a specific property. The point sources identified in this Report may not precisely reflect the location of the source of contamination on the Site, nor will they describe the spread of any contamination from the source. In addition, any point source that lies beyond the standard 1/4, 1/2 or 1.0 mile radius distances considered here will not be reflected in this Report—even if it is known to be the origin of a larger contaminated area. Point sources are included in this Report as of the time they are identified in the government lists consulted by JCP-LGS. If a box is checked "IS" on the above Summary of Determinations, JCP-LGS recommends further investigation of that Site. Please note that the Gas Transmission and Hazardous Liquid Pipeline disclosure is based on the Property's location with respect to "line sources" represented in that Database.

Some official lists may include Sites that have been closed or otherwise cleaned up, or are simply being monitored or regulated with no known contamination.

MAP OF SITES FOUND AROUND PROPERTY AT:

521 CRESCENT AVE, SAN MATEO, CA 94402

NOTE: The foregoing map may show more sites than are reported in the listing below. The map shows all sites found within the square coverage area. The listing below reports only those sites found within the standard radius search distance for the database listed, which covers a smaller area. Sites outside of that standard radius search distance are not listed below. The standard radius search distances for point sources are defined by the U.S. Environmental Protection Agency's "All Appropriate Inquiries" (AAI) guidelines. The AAI standard search distance differs between database categories, depending upon degree of potential hazard. Pipeline search distance (2,000 feet, red dashed circle on map) complies with U.S. bill H.R. 22 (Speier). See section called "Explanation of Databases Used" for the actual standard search distance used for each database category.

	(NPL) Federal National Priorities List or "Superfund" sites		(SWIS) Solid Waste Landfill Facilities
	(RCRA COR) Corrective Action Sites		(SLIC) Spills, Leaks, Investig. & Cleanup
	(LUST) Leaking Underground Storage Tanks		California EnviroStor State Response Sites
	Oil or Gas Well		Gas Transmission Pipelines (Approximate)
	Hazardous Liquid Pipelines (Approximate)

LIST OF SITES IDENTIFIED IN ENVIRONMENTAL DATABASE RECORDS SEARCH

The list below indicates the results of an electronic search of certain federal and state level environmental-hazard record systems, or databases, that are known to include contaminated sites. The databases are searched for hazard sites at standard distances from the subject property. The standard search distance is not the same for all databases, but depends upon the nature of the environmental hazard which the database represents. First American uses search distances that comply with the U.S. Environmental Protection Agency (EPA) "All Appropriate Inquiry" (AAI) standard for government records search (40 CFR Part 312.26) under the U.S. Small Business Liability Relief and Revitalization Act ("the Brownfields Law"). "Distance" is the straight line distance in miles between the Property geocode (latitude/longitude) and the Site geocode.

Open = Site listed as undergoing clean-up, investigation, or referral to another agency; or as non-active, abandoned or absorbed but not closed or completed.

Closed = Site listed as clean-up completed, release secured, no further remedial action planned, case closed, or delisted.

Active (or Inactive) = Site facility listed as actively (or not actively) engaged in a type of activity regulated under RCRA.

N/A = Not Applicable – site listed as uncontaminated, or as using or storing hazardous substances.

N/P = Not Provided – site status not supplied on agency list used.

JCP-LGS Residential Property Disclosure Report The EnviroCheck Report™ For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO County, CA 94402
("Residential Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

WHAT THIS MEANS: LUST STATUS: LUST sites are also known as LUFT, or Leaking Underground Fuel Tank, sites; we use the term LUST to be consistent with the State's current terminology. All of the Sites listed on the State's Leaking Underground Storage Tank Information System (LUSTIS) have been identified to have had a leaking storage tank. Many of LUST Sites have been cleaned up and the cases "Closed", and this is noted above if it is the case. Parties should be aware that LUST sites remain in the LUSTIS database even after they have been closed, and are included in this report if found by our search. Leaking underground storage tanks are the most common type of contamination. Storage tank leaks are often less extensive than other types of contamination releases and usually do not extend beyond the real property on which the tank is located.

For more information about a site listed above, please see the "EXPLANATION OF DATABASES USED IN THIS REPORT" and contact the agency responsible for maintaining that site database.

SITES MISSING KEY LOCATION INFORMATION

Many environmental sites in the databases searched have incomplete address information and cannot be precisely located. They are, therefore, considered "unlocatable" and could potentially be anywhere in the city, county, or state. The table below lists unlocatable sites whose address includes a zip code that matches the Property zip code or matches a neighboring zip code whose boundary is within the radius distance searched. The sites listed are not necessarily within one mile of the Property, and they are not included on the site map in this report. Sites without a zip code are not listed here. The databases searched include a large number of unlocatable addresses, and the list below is limited to a maximum of 30 sites. If 30 sites are listed below and you wish to view a **full list** of ALL unlocatable sites in California that include a zip code, please download the full list from our website at the following address:

http://www.disclosures.com/sites/default/files/Current_List_of_Unlocatable_Sites_by_Zip_Code.xlsx

Open = Site listed as undergoing clean-up, investigation, or referral to another agency; or as non-active, abandoned or absorbed but not closed or completed.

Closed = Site listed as clean-up completed, release secured, no further remedial action planned, case closed, or delisted.

Active (or Inactive) = Site facility listed as actively (or not actively) engaged in a type of activity regulated under RCRA.

N/A = Not Applicable – site listed as uncontaminated, or as using or storing hazardous substances.

N/P = Not Provided – site status not supplied on agency list used.

JCP-LGS Residential Property Disclosure Report The EnviroCheck Report™ For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO County, CA 94402
("Residential Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

OIL & GAS WELL LOCATIONS WITHIN 1/4 MILE OF THE RESIDENTIAL PROPERTY

No oil or gas well locations were identified within a radius of one-fourth (1/4) of one (1) mile of the Residential Property, based on a search of valid geographic coordinates contained in the current Statewide All Wells Database maintained by the California Department of Conservation, Division of Oil, Gas and Geothermal Resources (DOGGR) ("All Wells Database"). Buyer is advised that additional wells may exist in the area of the Residential Property which are not contained in the All Wells Database. Wells that do not have valid geographic coordinates in the All Wells Database are not disclosed in this Report. The physical property boundaries of well locations and the Residential Property are not factored into the calculation of the specified search radius.

EXPLANATION: The All Wells Database includes approximately 200,000 well location records. This database is searched for well locations within one-fourth (1/4) of one (1) mile around the geocoded point representing the Residential Property. Well locations, if any, within the specified parameters are listed in the table above.

Of the approximately 200,000 wells identified in the All Wells Database, 102,000 are classified as new, active, or idle in the latest Statewide All Wells Database release. The majority of remaining wells have been sealed under supervision of the DOGGR. A smaller number have been deserted and have no known responsible operator.

California has established laws with respect to well drilling, operation, maintenance, and abandonment to "prevent, as far as possible, damage to life, health, property, and natural resources; damage to underground oil and gas deposits from infiltrating water and other causes; loss of oil, gas, or reservoir energy, and damage to underground and surface waters suitable for irrigation or domestic purposes by the infiltration of, or the addition of, detrimental substances." (California Public Resources Code §3106).

The DOGGR is responsible for maintenance of orphaned wells. To defray the maintenance costs, oil companies pay the State 4.3 cents per barrel a year. A portion of this assessment funds the Orphan Well Plugging Fund ("Fund") with an annual \$1 million budget. Since its inception in the 1970's, the Fund has facilitated the plugging of wells by hired contractors. The selection process for wells to be plugged considers numerous factors including, but are not limited to, the proximity of wells to populated areas, the amount of pressure in well reservoirs, and other hazards.

For a complete listing and explanation of well status codes, visit the following DOGGR web page:
<http://www.conservation.ca.gov/dog/maps/Pages/GISMapping2.aspx>

FOR MORE INFORMATION: Ownership information of oil, gas, mineral, geothermal and other subsurface rights regarding the Residential Property may be disclosed in a preliminary (title) report or title commitment. The DOGGR does not use the County Assessor Parcel Number or site address to locate wells or leases, and therefore, the APN and address cannot be used to determine if there is a well on a specific property. To help tell if there is a well on a property, oilfield maps may be available on the DOGGR website (<http://www.conservation.ca.gov/dog/maps/Pages/GISMapping2.aspx>). In addition, the DOGGR Online Mapping System (<http://maps.conservation.ca.gov/doms/doms-app.html>) allows users to search well locations by API Number, Property Address, Geographic Coordinates, or Field Name. For detailed information about a specific well, reference the unique "API Number" that the DOGGR has assigned to it. The DOGGR website provides an online well search by API number at <http://opi.consrv.ca.gov/opi/opi.dll>. For further information, please contact the DOGGR at 916-445-9686.

NPMS GAS TRANSMISSION AND HAZARDOUS LIQUID PIPELINES WITHIN 2,000 FEET OF THE RESIDENTIAL PROPERTY

The Property IS NOT within 2,000 feet of one or more Gas Transmission Pipeline(s) or Hazardous Liquid Transmission Pipeline(s) as depicted on the National Pipeline Mapping System (NPMS). Buyer is advised to carefully review the limitations of the Public Record noted below as to the important limitations regarding the National Pipeline Mapping System and the NPMS Public Map Viewer used for making this determination. For more information please visit the NPMS Public Map Viewer (<https://www.npms.phmsa.dot.gov/PublicViewer/>).

EXPLANATION: Proximity to a pipeline does not of itself indicate a safety risk. However, on September 9, 2010, a Pacific Gas and Electric (PG&E) natural gas transmission pipeline exploded in San Bruno, California, causing loss of life and extensive property damage. Following this incident much attention has focused on the presence of natural gas and hazardous liquid pipelines in the vicinity of residential neighborhoods. As a result, PG&E is notifying residents within 2,000 feet of PG&E's natural gas transmission pipelines about their proximity

This disclosure covers gas "transmission" and hazardous liquid pipelines only. It is important to note that every home that uses natural gas is connected to a gas "distribution" pipeline. Distribution pipelines are generally of smaller size and lower pressure than transmission pipelines. This disclosure does not include distribution pipelines nor is it meant to indicate there is no risk associated with distribution lines. While proximity to a pipeline does not of itself indicate a safety risk, excavation near a pipeline poses a definite hazard. For this reason, this disclosure includes an advisory about how to spot and avoid buried pipelines on and near a property.

The U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration (PHMSA) administers the national regulatory program to monitor the transportation of natural gas, liquefied natural gas (LNG), and hazardous liquids by pipeline. PHMSA and the U.S. Office of Pipeline Safety (OPS) maintain a database of pipeline information called the **National Pipeline Mapping System (NPMS)** in cooperation with other federal and state governmental agencies and the pipeline industry. The NPMS is created using data compiled from mandatory submissions to PHMSA made by operators of pipelines and LNG plants, and from voluntary submissions made by breakout tank operators. The data is processed by private contractors. Since 2002, transmission pipeline and LNG plant facility operators are required to update their submissions annually.

The PHMSA website provides a **Public Map Viewer** that allows the general public to view pipeline maps in one county at a time. The viewer displays maps and associated data identifying transmission pipelines, LNG plants, and breakout tanks stored in the NPMS database. The data include information about the pipeline commodity (e.g., natural gas or liquid fuel), pipeline operator, agency contact, etc. The Public Map Viewer can be accessed at the following address:
<https://www.npms.phmsa.dot.gov/PublicViewer/>

This pipeline disclosure is based on a proximity search of the gas transmission pipelines and hazardous liquid pipelines depicted in NPMS Public Map Viewer at a scale of approximately 1:24,000. At that map scale, one inch on the map equals approximately 2,000 feet on the ground, which is the maximum map resolution at which pipelines are displayed.

This disclosure is provided as an accommodation and is subject to the following **limitations in the Public Record**:

- Access to the original digital data in the NPMS database (on which the public maps are based) is restricted to federal, state, and local government agencies (including emergency responders). Pipeline operators are allowed access to their own pipeline data only.
- Pipeline locations in the NPMS database are accurate to plus or minus 500 feet.
- Neither the United States government nor any party involved in the creation and compilation of NPMS data and maps guarantees the accuracy or completeness of its product.
- Because the NPMS digital data are restricted from public access, any disclosure based on the NPMS Public Map Viewer may be subject to some positional inaccuracies in addition to those acknowledged by NPMS.
- Neither this disclosure nor NPMS data should ever be used as a substitute for calling "811" -- the federally-mandated "Call Before You Dig" one-call center -- prior to any digging project.

JCP-LGS Residential Property Disclosure Report The EnviroCheck Report™ For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO County, CA 94402
("Residential Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

How to Spot a Pipeline Easement

Read the Preliminary Title Report A pipeline right-of-way is a strip of land over and around pipelines where some of the property owner's legal rights have been granted to a pipeline company. A right-of-way agreement between the pipeline company and the property owner is also called an easement and is usually filed in the public records with property deeds. Rights-of-way and easements provide a permanent, limited interest in the land that enables the pipeline company to operate, test, inspect, repair, maintain, replace, and protect one or more pipelines on property owned by others. The agreement may vary the rights and widths of the right-of-way, but generally, the pipeline company's right-of-ways extend 25 feet from each side of a pipeline unless special conditions exist.

To determine if the Property includes a pipeline right-of-way or easement, OBTAIN COPIES OF ALL OF THE EXCEPTIONS LISTED ON THE PRELIMINARY (TITLE) REPORT FROM THE TITLE COMPANY AND READ THEM.

Call Before You Dig – Every Time! In 2000, the U.S. Department of Transportation and the utility industry created the Common Ground Alliance (CGA), a trade association to work with all industry stakeholders in an effort to prevent damage to underground utility infrastructure and ensure public safety and environmental protection. The result is the “**Call Before You Dig – 811 Service**”. Whether you are a homeowner or a professional excavator, every digging job requires a call to “811” – even small projects like planting trees or shrubs. If you hit an underground utility line while digging, you can harm yourself or those around you, disrupt service to an entire neighborhood and potentially be responsible for fines and repair costs. One call to 811 gets your underground utility lines marked for FREE.

Signs of Buried Pipelines Since pipelines are usually buried underground, line markers and warning signs like the ones shown here are used to indicate their approximate location along the pipeline route. The markers and signs are in high-visibility colors (yellow or orange) and are located at frequent intervals along the pipeline right-of-way. The markers can be found where a pipeline intersects a street, highway, railway, or waterway, and at other prominent points along the route. The markers display the material transported in the line, the name of the pipeline operator, and a telephone number where the operator can be reached in the event of an emergency. Pumping stations, tank farms, and cleared rights-of-way also help signal that a pipeline is located nearby.

Markers and warning signs only indicate the general location of a pipeline. They cannot be relied upon to indicate the exact position of the pipeline they mark. Also, the pipeline may not follow a straight course between markers. And, while markers are helpful in locating pipelines, they are limited in the information they provide. They provide no information, for example, about the depth or number of pipelines in the vicinity.

JCP-LGS Residential Property Disclosure Report The EnviroCheck Report™ For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO County, CA 94402
("Residential Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

EXPLANATION OF THE DATABASES USED IN THIS REPORT

This Report uses the following Databases as of the date specified:

1. NATIONAL PRIORITIES LIST ("NPL" - commonly called "Superfund" or "CERCLIS" site list) as of February 2013.

The National Priorities List is a U.S. Environmental Protection Agency ("USEPA") database which includes Sites where known releases or threatened releases of hazardous substances, pollutants, or contaminants have occurred. As a part of the Superfund cleanup program, the NPL helps the USEPA determine which Sites warrant further investigation to assess human health and environmental risks, identify what remedial actions may be appropriate, notify the public of Sites believed to warrant further investigation, and serve notice to potentially responsible parties that the USEPA may initiate remedial action. Some NPL Sites encompass relatively large areas. **Search Distance: one (1.0) mile. Responsible Agency: USEPA**

Public Record: Facilities located in California listed as NPL Status code "A" (Site is Part of NPL Site), "D" (Deleted from the Final NPL), "F" (Currently on the Final NPL), "P" (Proposed for NPL), "R" (Removed from Proposed NPL), or "W" (Withdrawn) in the Region IX Active CERCLIS database obtained from USEPA. Facilities assigned NPL Status code "N" (Not on the NPL) are not disclosed in this Report.

For More Information: Contact the Environmental Protection Agency Superfund Hotline at (800) 424-9346 to speak with a Superfund consultant to request information from the individual Site Fact Sheet. This help-line can also provide the telephone number of the local Community Relations Coordinator for the Site in question and the location of the local information repository for that Site. The USEPA's official Internet website address is:

<http://www.epa.gov/superfund/index.htm>

2. RESOURCE CONSERVATION & RECOVERY ACT--CORRECTIVE ACTION list ("RCRA-COR") as of February 2013.

RCRA (pronounced "ric-ra") is a federal law enforced by the U.S. Environmental Protection Agency ("USEPA") that requires safeguards on the use and disposal of household, municipal, commercial and industrial refuse. The goals of the law are to protect human health and the environment from the potential hazards of waste disposal, to reduce the amount of waste generated, and to ensure that wastes are managed in an environmentally sound manner. Under the Corrective Action program, the USEPA permits and monitors the cleanup of hazardous waste contamination. **Search Distance: one (1.0) mile. Responsible Agency: USEPA**

Public Record: "Subject to Corrective Action" facilities identified using USEPA's RCRAInfo Hazardous Waste Query Form for California.

For More Information: Contact the Environmental Protection Agency at (800) 424-9346 to speak with a consultant to request information from the individual Site Fact Sheet. The USEPA's official Internet website address is:

<http://www.epa.gov/enviro/html/rcris/index.html>

3. CALIFORNIA ENVIROSTOR STATE RESPONSE list as of February 2013.

The State Response list, a part of California's "Envirostor" database, identifies sites of confirmed hazardous materials releases where the Department of Toxic Substances Control ("DTSC") is involved in cleanup activities, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk, according to the DTSC. The State Response list includes the sites formerly contained in the "Active Annual Workplan (AWP)" list. **Search Distance: 1/2 mile. Responsible Agency: State EPA/DTSC**

Public Record: Sites listed as "State Response" under "Site_Facility_Type" in the EnviroStor Cleanup Sites database obtained from the Department of Toxic Substances Control. Please note that a given Site may have more than one record if the Site has more than one activity Status or EnviroStor ID assigned to it.

JCP-LGS Residential Property Disclosure Report The EnviroCheck Report™ For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO County, CA 94402
("Residential Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

For More Information: Contact the State Environmental Protection Agency Department of Toxic Substances Control at: (916) 323-3400

4. SPILLS, LEAKS, INVESTIGATION & CLEANUP list ("SLIC") as of February 2013.

The California SLIC Program oversees soil and water investigations, corrective actions, and assessments at Sites with current or historic unauthorized discharges and covers all types of pollutants (such as solvents, petroleum fuels, heavy metals, pesticides, etc.). As of January 1, 2005, all SLIC data is required to be submitted to the Geotracker database of the State Water Resources Control Board ("SWRCB"). Information on individual Sites may be available online at geotracker.waterboards.ca.gov. Please note that according to the SWRCB, "data is undergoing data cleanup and may contain errors". **Search Distance:** 1/2 mile. **Responsible Agency:** SWRCB

Public Record: Sites identified as "Cleanup Program Site" in the GeoTracker database obtained from the State Water Resources Control Board GeoTracker website.

For More Information: For details about a particular site, please visit GeoTracker at geotracker.waterboards.ca.gov. Using the Identifier tool and clicking on the site on the graphic map interface, you can access a report that includes the case number and contact telephone number for the agency with more information on this site. If you know case number, you may access the record using Case Finder at <http://geotracker.waterboards.ca.gov/search.asp>

5. SOLID WASTE INFORMATION SYSTEM list ("SWIS") as of February 2013.

Solid waste landfill sites vary from state to state and may include active landfills, inactive landfills, incinerators, transfer stations, recycling facilities, and other facilities where solid waste is treated or stored. The California Integrated Waste Management Board ("CIWMB") tracks such Sites via its Solid Waste Information System database. SWIS contains information on facility type, regulatory and operational status, type of wastes received, and local enforcement actions. Please note that *these Sites are simply regulated facilities and are not classified as being "contaminated"* by the Board. **Search Distance:** 1/2 mile. **Responsible Agency:** CIWMB

Public Record: Sites listed in the "SwisGis.txt" database obtained from the California Integrated Waste Management Board Solid Waste Information System website.

For More Information: Contact the Board's "Solid Waste Information Center" at (916) 341 6320 and ask for the Associate Waste Management Specialist who should be able to answer some limited general questions. For more information, please contact the CIWMB in Sacramento or visit <http://www.calrecycle.ca.gov/SWFacilities/Directory/search.aspx> on the Internet.

6. LEAKING UNDERGROUND STORAGE TANK list ("LUST") per GEIMS/GeoTracker Information Management System as of February 2013.

The LUST database is also known as the "LUFT" database because it includes records of leaking underground fuel tanks. LUSTs may be a significant source of soil and groundwater contamination. The State Water Resources Control Board ("SWRCB") maintains a database of LUSTs known as the Leaking Underground Storage Tank Information System ("LUSTIS") which was recently supplanted by the statewide GEIMS/GeoTracker information management system. LUSTIS contains the locations of all reported LUSTs, as well as the contents and status of the LUSTs. **Search Distance:** 1/4 mile. **Responsible Agency:** SWRCB

Public Record: Sites identified as "LUST Cleanup Site" in the GeoTracker database obtained from the State Water Resources Control Board GeoTracker website.

For More Information: For general questions, telephone the State Water Resources Control Board's Clean Water Desk in Sacramento at (866) 480-1028. Information on specific Sites is available at www.swrcb.ca.gov or visit their official Internet site at geotracker.waterboards.ca.gov

JCP-LGS Residential Property Disclosure Report The EnviroCheck Report™ For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO County, CA 94402
("Residential Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

7. CALIFORNIA STATEWIDE ALL WELLS DATABASE as of February 2013.

The California Division of Oil, Gas, and Geothermal Resources, California Department of Conservation ("DOC"), maintains a database of oil, gas and geothermal wells in the state. Of the approximately 200,000 wells identified in the All Wells Database, approximately 102,000 are still in use. The majority of remaining wells have been sealed under supervision of the DOGGR. A smaller number have been deserted and have no known responsible operator. **Search Distance: 1/4 mile. Responsible**

Agency: State Department of Conservation

Public Record: Well locations listed in the Statewide All Wells Database obtained from the Department of Conservation, Division of Oil, Gas and Geothermal Resources.

For More Information: Contact the State Department of Conservation, Division of Oil, Gas and Geothermal Resources at: (916) 445-9686.

8. NATIONAL PIPELINE MAPPING SYSTEM (NPMS) GAS TRANSMISSION AND HAZARDOUS LIQUID PIPELINES as of February 2013.

The National Pipeline Mapping System (NPMS) is a geographic information system (GIS) created by the [U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration](#) (PHMSA), [Office of Pipeline Safety](#) (OPS) in cooperation with other federal and state governmental agencies and the pipeline industry. The NPMS is created using data compiled from mandatory submissions made by pipeline, LNG (Liquid Natural Gas) plant operators, and voluntary submissions made by breakout tank operators. The data is processed by private contractors. Neither the United States government nor any party involved in the creation and compilation of NPMS data and maps guarantees its accuracy or completeness. NPMS data should be considered no more accurate than +/- 500 feet and must never be used as a substitute for contacting the appropriate one-call center prior to digging. PHMSA restricts access to the NPMS to federal, state, and local government agencies (including emergency responders). Pipeline operators are allowed access to their own pipeline data only. NPMS Public Map Viewer (<https://www.npms.phmsa.dot.gov/PublicViewer/>) allows the general public to view available data one county at a time and at a limited zoom level in accordance with PHMSA's security policy.

Search Distance: 2,000 feet. Responsible Agency: PHMSA

Public Record: Gas transmission pipelines and hazardous liquid pipelines as depicted on the NPMS Public Map Viewer at a scale of 1:24,000.

For More Information: To identify a specific pipeline owner/operator, please use the NPMS Public Map Viewer at the URL provided above. For policy and technical questions regarding NPMS, please contact PHMSA.

WANT MORE INFORMATION?

There is no single government agency that handles information for all contaminated Sites. Multiple agencies are responsible for organizing clean-up efforts at different types of Sites. Each generally maintains files on the Sites they oversee with information on the type and extent of contamination, clean-up efforts etc. There is also the possibility that the file may have no additional information. For general information, refer to the discussions in this report. If your question isn't answered there, call us here at JCP-LGS. We will try and answer them for you.

In the list of databases above, there is the name and telephone number of the agency overseeing that site. Agencies are limited to answering general questions. **NOTE!** Additional information on a site may be limited and the government agency you contact will not venture opinions.

JCP-LGS Residential Property Disclosure Report The EnviroCheck Report™ For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO County, CA 94402
("Residential Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

How to Obtain Generalized Environmental Information

Brochures published by the Environmental Protection Agency (EPA) are a good source of general information. County health departments may have a health and safety officer or a "hazmat" (hazardous materials) specialist that can answer general questions also. The telephone number for the local Department of Health should be listed in the telephone book.

Environmental Protection Agency Drinking Water Hotline: **(800) 426-4791**
Federal Environmental Protection Agency Public Information Office: **(866) 372-9378**
California Environmental Protection Agency: **(916) 445-3846**

BACKGROUND ABOUT ENVIRONMENTAL HAZARDS

JCP-LGS provides a consumer guide titled, "Guide to Environmental Hazards", as a supplement to this EnviroCheck report. This "plain-English" supplement discusses and explains environmental hazards and what they mean for residential property transactions. The guide may be freely downloaded (as a PDF document) and printed from our website at the following address:

<http://www.disclosures.com/sites/default/files/fanhdguidetoenvironmentalhazards.pdf>

JCP-LGS Residential Property Disclosure Report The EnviroCheck Report™ For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO County, CA 94402
("Residential Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

METHODS AND LIMITATIONS -- PLEASE READ!

As in all studies and reports, there are limitations in this Report. This Part will summarize (a) the methods used in creating this Report, (b) the limitations with respect to the data and the government site lists ("Databases"), and (c) the responsibilities and liabilities of JCP-LGS under this Report. Please read this Part carefully so you understand the limitations on this Report and JCP-LGS's responsibilities.

A. LIMITATIONS ON DATABASE INFORMATION

JCP-LGS has accurately reported the information in the Databases as of the Database Dates. With respect to the Databases, it is important to understand that:

- The Databases may not be accurate, current, fully detailed, or complete.
- A parcel of real property may be affected by contamination or environmental hazards that have not been identified on any of the Databases.
- A Database may not contain sufficient information to locate a particular parcel of property.
- Changes may have occurred in the Databases since the Database Date specified above.
- There may be other governmental databases with relevant information which are not included in this Report.

B. JCP-LGS DOES NOT CONSTANTLY CHECK DATABASES FOR CHANGES

Each Database used in this Report is updated by the Responsible Agency at various intervals. Updates for a Database are determined by the Responsible Agency and may be made at any time and without notice. JCP-LGS maintains an update schedule and makes reasonable efforts to use updated information but it cannot feasibly do so on a constant basis, and the complexities of obtaining and adapting the data into a usable format for preparing this Report necessitates some delay once the updated information is obtained. For these reasons, JCP-LGS reports information as of the date when the Database was last updated by JCP-LGS. That date is specified as the "Database Date" for each Database in Part 4.

C. LIMITATIONS ON HOW SITES ARE LOCATED AND REPORTED

Due to the way information is reported in the Databases, the Sites identified are "POINT SOURCES" ONLY which means that the specific location of the Site is located based on the information in the Database and used as the beginning point for measuring the distance to the Residential Property. This Report does NOT use "AREAS" of potential environmental contamination, such as a contamination study area or a groundwater plume, even if the source of that study area or plume derives from a Site. In other words, this Report identifies a single point as the approximate source point for an environmental hazard identified on a Database, even if the hazard actually covers an expanded area. The Gas Transmission and Hazardous Liquid Pipeline disclosure is based on the Property's location with respect to "LINE SOURCES" represented in that Database.

In the Databases, the Sites are identified by their address. In this Report, the point location for a Site is based on that address, **not** on the actual location of a source of contamination on the Property. As a result, the location of any Site set forth in this Report may not be precisely the location of the source of contamination. Furthermore, some of the Databases may not have the complete address information for a Site so it can not be located at all.

The location of the Residential Property has been determined by cross-referencing the provided Assessor Parcel Number ("APN") against a vector parcel database in which the boundaries of the parcel corresponding to the given APN are represented as a georeferenced polygon. Sites that are mapped within the specified radii of this polygon will be reported. Furthermore, since Sites are located using a geographic information system, if the assessor parcel number or address of the Residential Property provided is inaccurate, the information provided in this Report will not be accurate.

In certain instances, Sites cannot be precisely located (or "geocoded") due to missing or inaccurate data in the Database. However, based on information available in the Databases, these Sites are locatable within zip codes. These Sites are referred to as "Unlocated Sites" and reported in the Part, "Sites Missing Key Location Information." That Part of the Report indicates such Unlocated Sites that are in the zip codes that are within a one (1) mile radius of the Residential Property.

JCP-LGS Residential Property Disclosure Report The EnviroCheck Report™ For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO County, CA 94402
("Residential Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

Unlocated Sites are not necessarily within a one mile radius of the Residential Property. These Sites are identified to alert the Parties to potential issues about which the Parties may desire to obtain further information.

For these reasons, Parties should seek additional information about the Sites listed, as described in the discussion of the relevant Database.

D. LIMITATIONS IN THIS REPORT

JCP-LGS does not make any representations as to:

- The accuracy, validity or completeness of the Databases.
- The significance or extent of the contamination or remediation of any of the Sites identified in the Databases.
- The health hazards to humans or animals that may be associated with any of the substances that may exist at the Sites or how they may affect the Residential Property.
- The drinking water sources for the Residential Property.
- Any information in a Database after the Database Date for that Database.
- Any information regarding the Residential Property after the Report Date.

JCP-LGS does not perform a physical examination or any testing of the Residential Property or the Sites. This Report only provides information derived from the Databases in accordance with the Methods and Limitations. This Report should not be considered a substitute for an on-site environmental assessment. If additional information is desired, the Parties are encouraged to investigate other sources and to consult an environmental expert.

E. ONLY THE PARTIES MAY RELY ON THIS REPORT

This Report is valid, the Parties may rely on the Report, and a contract is formed with JCP-LGS, **only** upon receipt by JCP-LGS of payment of the full price of the Report.

This Report may be relied upon only by the Parties to the transaction for which it has been purchased. This Report cannot be relied upon (a) by any persons other than the Seller, the Buyer and their Agents, (b) for any other real property, or (c) for any future transactions involving the Residential Property. The price paid for the Report does not include any amounts for protection of such other parties.

F. LIMITATIONS ON JCP-LGS's LIABILITY

Given the limited nature of this Report, and the fact that JCP-LGS is reporting, not assuming liability, JCP-LGS is not responsible for:

- Any inaccuracies or incompleteness of the information in the Databases.
- Inaccurate address information provided for the Residential Property.
- Any other information not contained in the specified Databases.
- Any information which would be disclosed by a physical inspection of the Residential Property.
- Any information known by one of the Parties.
- Any changes to the information in the Databases after the Database Date.
- The health hazards to humans or animals that may be associated with any of the substances that may exist at the Sites or how they may affect the Residential Property.
- The costs of investigating or cleaning up any environmental hazards.

This Report is not an insurance policy and does not provide the same protections as an insurance policy. It does not obligate JCP-LGS to defend any Party against any claims, and JCP-LGS shall not have any duty to defend against any claims pursuant to California Civil Code § 2778 or otherwise. The price of this Report has not been based upon any responsibility for defense costs, nor for assumption of environmental risks. The premium for an insurance policy would be significantly greater than the cost of this Report. The Parties acknowledge that claims for damages beyond actual losses can significantly increase the costs of reports and make prompt resolution of claims more difficult. In order to induce JCP-LGS to provide this Report for

JCP-LGS Residential Property Disclosure Report The EnviroCheck Report™ For SAN MATEO COUNTY

Property Address: 521 CRESCENT AVE,
SAN MATEO, SAN MATEO County, CA 94402
("Residential Property")

APN: 032-021-020
Report Date: 05/23/2013
Report Number: 1336416

the price charged, and to help streamline the process of resolving any disputes between the Parties and JCP-LGS, the Buyer, Seller and Agents agree that if there is a material error or omission in this Report:

- **The Party who suffers damages as a result of such error or omission shall be entitled at most to recover from JCP-LGS the actual proved damages measured by the difference in the fair market value of the Residential Property as of the Report Date, caused by the error or omission but not in excess of \$100,000 Dollars (\$100,000).**
- **JCP-LGS shall not be liable for indirect, consequential, or punitive damages (including, but not limited to, emotional distress or pain and suffering).**

JCP-LGS shall not be liable to a Party for any matters known to that Party or its Agent (including errors in this Report) and not disclosed in writing to both the other Parties and JCP-LGS prior to the Sale Date.

G. SELLER AND SELLER'S AGENT'S RESPONSIBILITY OF FULL DISCLOSURE

Sellers of real property and their Agents should always fully disclose all material facts regarding the real property which they are selling. Regardless of the information in this Report, if Seller or Seller's Agent has any actual knowledge of contamination, releases of hazardous materials or remediation activities potentially affecting the Residential Property, that information should be promptly disclosed in writing to the Buyer and the Buyer's Agent.

H. OTHER AGREEMENTS

This Report sets forth the complete, integrated agreement between JCP-LGS and the Parties. Evidence of prior or contemporaneous statements, representations, promises or agreements shall not be admissible to vary the terms of this written agreement. This agreement may not be changed or amended except by a written document signed by an authorized representative of JCP-LGS and the Parties.

In the event that any dispute arises between JCP-LGS and any Parties arising out of or relating to this Report or its subject matter, or any act or omission of JCP-LGS, the prevailing party shall be entitled to recover his, her or its reasonable costs, including attorneys' fees, from the losing party.

If any provision of this Report, or its application to any circumstance, is held to be invalid, unenforceable, or void, the remainder of this Report shall remain in full force and effect and enforced to the fullest extent possible.
